When cameras are installed for purposes of security and access control, one week should in most cases be more than sufficient for security personnel to make an informed decision whether to retain any footage for longer in order to further investigate a security incident or use it as evidence. Indeed, these decisions can usually be made in a matter of hours. Therefore, institutions should establish a retention period not exceeding seven calendar days. In most cases a shorter period should suffice.</i></p> <p>ESMA follows this same approach and images covering the public or semi-public areas are stored for a period of 7 days and then overwritten. If any image needs to be stored longer as part of a wider investigation (e.g. in the case of an administrative inquiry) or for serving as evidence regarding a security incident, the relevant footage is quarantined and retained for as long as necessary for the specific investigation in line with the applicable retention periods.</p>
8	Recipients of the data	Access to the system is limited to the Security officer and its delegates, as well as the technical support upon request.
