I. Background

1. The Alternative Investment Fund Managers Directive (AIFMD) puts in place a comprehensive framework for the regulation of alternative investment fund managers within Europe. The extensive requirements with which AIFMs must comply are designed to ensure that these managers can manage AIFs on a cross-border basis and the AIFs that they manage can be sold on a cross-border basis.
2. The AIFMD framework is made up of Directive 2011/61/EU¹, which has been supplemented by technical delegated and implementing measures², including Commission Regulation (EU) No 231/2013³, Commission Regulation (EU) No 447/2013⁴, Commission Regulation (EU) No 448/2013⁵, and Commission Regulation (EU) No 694/2014⁶.
3. ESMA is required to play an active role in building a common supervisory culture by promoting common supervisory approaches and practices. In this regard, the Authority develops Q&As as and when appropriate to elaborate on the provisions of certain EU legislation or ESMA guidelines.
4. The European Commission has published its own Q&A on AIFMD⁷. Moreover, according to Article 16b of the ESMA Regulation, ESMA forwards questions that require the interpretation of Union law to the European Commission. In this document, ESMA publishes also answers provided by the European Commission to the questions forwarded.

II. Purpose

5. The purpose of this document is to promote common supervisory approaches and practices in the application of the AIFMD and its implementing measures. It does this by providing responses to questions posed by the general public and competent authorities in relation to the practical application of the AIFMD.
6. The content of this document is aimed at competent authorities under AIFMD to ensure that in their supervisory activities their actions are converging along the lines of the responses adopted by ESMA. However, the answers are also intended to help AIFMs

¹ DIRECTIVE 2011/61/EU of the European Parliament and of the Council of 8 June 2011 on Alternative Investment Fund Managers and amending Directives 2003/41/EC and 2009/65/EC and Regulations (EC) No 1060/2009 and (EU) No 1095/2010

³ COMMISSION DELEGATED REGULATION (EU) No 231/2013 of 19 December 2012 supplementing Directive 2011/61/EU of the European Parliament and of the Council with regard to exemptions, general operating conditions, depositaries, leverage, transparency and supervision

⁴ COMMISSION IMPLEMENTING REGULATION (EU) No 447/2013 of 15 May 2013 establishing the procedure for AIFMs which choose to opt in under Directive 2011/61/EU of the European Parliament and of the Council

⁵ COMMISSION IMPLEMENTING REGULATION (EU) No 448/2013 of 15 May 2013 establishing a procedure for determining the Member State of reference of a non-EU AIFM pursuant to Directive 2011/61/EU of the European Parliament and of the Council

⁶ COMMISSION DELEGATED REGULATION (EU) No 694/2014 of 17 December 2013 supplementing Directive 2011/61/EU of the European Parliament and of the Council with regard to regulatory technical standards determining types of alternative investment fund managers

⁷ https://finance.ec.europa.eu/system/files/2017-05/aifmd-commission-questions-answers_en.pdf.

by providing clarity as to the content of the AIFMD rules, rather than creating an extra layer of requirements.

III. Status

7. The Q&A mechanism is a practical convergence tool used to promote common supervisory approaches and practices under Article 16b of the ESMA Regulation.⁸
8. Therefore, due to the nature of Q&As, formal consultation on the draft answers is considered unnecessary. However, even if they are not formally consulted on, ESMA may check them with representatives of ESMA's Securities and Markets Stakeholder Group, the relevant Standing Committees' Consultative Working Group or, where specific expertise is needed, with other external parties.
9. ESMA will review these questions and answers on a regular basis to identify if, in a certain area, there is a need to convert some of the material into ESMA guidelines. In such cases, the procedures foreseen under Article 16 of the ESMA Regulation will be followed.

IV. Questions and answers

10. This document is intended to be continually edited and updated as and when new questions are received. The date each question was last amended is included after each question for ease of reference.

⁸ Regulation (EU) No 1095/2010 of the European Parliament and of the Council of 24 November 2010 establishing a European Supervisory Authority (European Securities and Markets Authority), amending Decision No 716/2009/EC and repealing Commission Decision 2009/77/EC Regulation, 15.12.2010, L331/84.

Section I: Remuneration

Date last updated: 27 June 2014

Question 1 [last update 17 February 2014]: To which accounting period should AIFMs performing activities under the AIFMD before 22 July 2013 and submitting an application for authorisation under the AIFMD between 22 July 2013 and 22 July 2014 apply the AIFMD remuneration rules for the first time?

Answer 1: Paragraph 4 of the Guidelines on sound remuneration policies under the AIFMD (ESMA/2013/232) (the Remuneration Guidelines) states that “*These Guidelines apply from 22 July 2013, subject to the transitional provisions of the AIFMD*”. The Commission Q&A on the AIFMD provided specific guidance on the interpretation of the transitional provisions under Article 61(1) of the AIFMD.⁹

According to Article 61(1) of the AIFMD, AIFMs performing activities under the AIFMD before 22 July 2013 have one year from that date to submit an application for authorisation. Once a firm becomes authorised under the AIFMD, it becomes subject to the AIFMD remuneration rules and the Remuneration Guidelines. Therefore, the relevant rules should start applying as of the date of authorisation.

However, as for the rules on variable remuneration (i.e. the ones for which guidance is provided under Sections XI. (Guidelines on the general requirements on risk alignment) and XII. (Guidelines on the specific requirements on risk alignment) of the Remuneration Guidelines), AIFMs should apply them for the calculation of payments relating to new awards of variable remuneration to their *identified staff* (as defined in the Remuneration Guidelines) for performance periods following that in which they become authorised. So the AIFMD regime on variable remuneration should apply only to full performance periods and should first apply to the first full performance period after the AIFM becomes authorised. For example:

1. An existing AIFM whose accounting period ends on 31 December and which obtained an authorisation between 22 July 2013 and 31 December 2013: the AIFMD rules on variable remuneration should apply to the calculation of payments relating to the 2014 accounting period.
2. An existing AIFM whose accounting period ends on 31 December obtains an authorisation between 1 January 2014 and 22 July 2014: the AIFMD rules on variable remuneration should apply to the calculation of payments relating to the 2015 accounting period.

However, for an existing AIFM whose accounting period ends on 31 December which submits an application for authorisation by 22 July 2014 and obtains an authorisation after that date (including when the authorisation is obtained after 31 December 2014), the AIFMD rules on

⁹ ID 1180. Transitional provisions, available at: <http://ec.europa.eu/yqol/index.cfm?fuseaction=question.show&questionId=1180>.

variable remuneration should apply to the calculation of payments relating to the 2015 accounting period.

Question 2 [last update 17 February 2014]: To which accounting period should AIFMs not performing activities under the AIFMD before 22 July 2013 and obtaining an authorisation under the AIFMD after 22 July 2013 apply the remuneration rules for the first time?

Answer 2: Once a firm becomes authorised under the AIFMD, it becomes subject to the AIFMD remuneration rules and the Remuneration Guidelines and the relevant rules should start to apply as of the date of authorisation.

However, as for the rules on variable remuneration (i.e. the ones for which guidance is provided under Sections XI. (Guidelines on the general requirements on risk alignment) and XII. (Guidelines on the specific requirements on risk alignment) of the Remuneration Guidelines), AIFMs should apply them for the calculation of payments relating to new awards of variable remuneration to their *identified staff* (as defined in the Remuneration Guidelines) for performance periods following that in which they submit an application for authorisation. An AIFM submitting an application for authorisation in the year N (after 22 July 2013), should apply the AIFMD remuneration regime on variable remuneration only to the calculation of payments relating to the accounting period for year N+1.

Question 3 [last update 17 February 2014]: Which staff of the delegate should be covered by the “appropriate contractual arrangements” that ensure there is no circumvention of the remuneration rules as set out in paragraph 18(b) of the Remuneration Guidelines?

Answer 3: Such contractual arrangements must only be in place in respect of the delegate’s *identified staff* who have a material impact on the risk profiles of the AIFs it manages as a result of the delegation, and only in respect of the remuneration for such delegated activities.

Question 4 [last update 17 February 2014]: In a delegation arrangement where the delegate is subject to the CRD rules, can the delegate be considered to be subject to regulatory requirements on remuneration that are equally as effective as those applicable under the Remuneration Guidelines?

Answer 4: Provided that the staff of these entities who are *identified staff* for the purpose of the Remuneration Guidelines are subject to the CRD rules, these entities are subject to regulatory requirements on remuneration that are equally as effective as those applicable under the Guidelines.

Question 5 [last update 27 June 2014]: Can AIFMs choose to exclude portfolio managers from the scope of *identified staff* for the purpose of the Remuneration Guidelines purely because they are bound by investment limits set out by law and/or internal risk limits set out in the investment restrictions of the AIF?

Answer 5: No. Paragraph 20 of the Remuneration Guidelines provides for a presumption that certain categories of staff should be included as the *identified staff*. ‘Other risk takers’ are mentioned among these categories of staff. This category includes ‘*staff members, whose*

professional activities – either individually or collectively, as members of a group (e.g. a unit or part of a department) – can exert material influence on the AIFM’s risk profile or on an AIF it manages’. When assessing whether a portfolio manager can exert material influence, a number of questions are relevant:

- 1) is the percentage size of the AIF portfolio being managed small?
- 2) is the portfolio manager required to meet (and outperform) a performance benchmark?
- 3) is the percentage deviation from that benchmark which is tolerated by the AIFM small?
- 4) does the AIFM monitor the performance of the portfolio manager daily?

Where the answer to any of the above questions is ‘no’, a portfolio manager is likely to fall within the scope of *identified staff*. Where the answer to all of the questions above is ‘yes’, a portfolio manager is more likely to fall outside the scope of *identified staff*. Given that the criteria are qualitative, it may still be the case that for some combinations of 1) and 3) above, a portfolio manager may still exert material influence on an AIFM’s risk profile or on an AIF it manages, in which case the Remuneration Guidelines should apply.

Question 6 [last update 5 October 2017]: Do the remuneration-related disclosure requirements under Article 22(2)(e) of the AIFMD also apply to the staff of the delegate of an AIFM to whom portfolio management or risk management activities have been delegated?

Answer 6: Yes. In line with the approach followed under the AIFMD Remuneration Guidelines¹⁰, AIFMs can ensure compliance in one of the following two ways:

- i) where the delegate is subject to regulatory requirements on remuneration disclosure for its staff to whom portfolio management or risk management activities have been delegated that are equally as effective as those under Article 22(2)(e) of the AIFMD, the AIFM should use the information disclosed by the delegate for the purposes of fulfilling its obligations under Article 22(e) of the AIFMD and Article 107 of the AIFMD Level 2 Regulation; or
- ii) in other cases, appropriate contractual arrangements should be put in place with the delegate allowing the AIFM to receive (and disclose in the annual report for the relevant AIF(s) that it manages) at least information on the total amount of remuneration for the financial year, split into fixed and variable remuneration, paid by the AIF and/or the AIFM to the identified staff of the delegate – and number of beneficiaries, and, where relevant, carried interest – which is linked to the delegated portfolio. This means that the disclosure should be done on a prorated basis for the part of the AIF’s assets which are managed by the identified staff within the delegate.

¹⁰ See paragraph 18 of the AIFMD Remuneration Guidelines.

In both situations set out above, the disclosure may be provided on an aggregate basis i.e. by means of a total amount for all the delegates of the AIFM in relation to the relevant AIF.

Question 7 [last update 5 October 2017]: Can the information mentioned under Article 22(2)(e) and (f) of the AIFMD be disclosed in the annual report by the way of a link to a document where the relevant information is available?

Answer 7: No. The information prescribed by Article 22(2)(e) and (f) of the AIFMD should be included in the annual report. This is without prejudice to references in the annual report to other documents where additional information may be found.

Section II: Notifications of AIFs

Date last updated: 13 June 2023

Question 1 [last update 17 February 2014]: What additional information should be provided under letter (f) of Annex IV of the AIFMD?

Answer 1: Letter (f) of Annex IV of the AIFMD should be understood as requesting all information set out in Article 23(1) of the AIFMD that is not already contained in Annex IV of the AIFMD.

Question 2 [last update 17 February 2014]: Should AIFMs that wish to market new investment compartments of AIFs in a Member State where these AIFs have been already notified undertake a new notification procedure via their competent authority?

Answer 2: Yes.

Question 3 [last update 1 April 2016]: If an EU AIF decides to offer additional fund units to investors, and the offer is limited to the investors already invested in the AIF, does the AIFM have to submit a new notification to the national competent authority in accordance with Article 31(2) of AIFMD?

Answer 3: No.

Question 4 [last update 3 June 2016]: For the purposes of Article 31 of AIFMD (marketing of units or shares of EU AIFs in the home Member State of the AIFM), does it make a difference whether the EU AIF to be marketed is domiciled in the home Member State of the EU AIFM or in another Member State?

Answer 4: No. Article 31 does not differentiate between the marketing of EU AIFs domiciled in the home Member State of the AIFM and EU AIFs domiciled in another Member State.

Question 5 [last update 3 June 2016]: Can an authorised EU AIFM, in its home Member State, market an EU feeder AIF with a non-EU master AIF pursuant to Article 31 of AIFMD?

Answer 5: No. Article 31(1), second subparagraph, allows an EU AIFM to market an EU feeder AIF in the home Member State of the AIFM as long as it has an EU master AIF which is managed by an authorised EU AIFM. Marketing of an EU feeder AIF with a non-EU master AIF is subject to Article 36(1) of AIFMD.

Question 6 [last update 16 November 2016]: An AIF is marketed in a host Member State by way of the AIFMD marketing passport (Article 32 of AIFMD). A new share class of the AIF is set up, which will be marketed in the host Member State. Should this be regarded as a material change, which would require a new notification pursuant to Article 32?

Answer 6: No. The creation of a share class, which is to be marketed cross-border within an already notified (sub-)fund, does not constitute a material change of the notification.

Question 7 [last update 16 November 2016]: An AIFM wishes to notify a material change to a notification made to the competent authorities in its home Member State to manage or market an AIF on a cross-border basis (Articles 32(7) or 33(6) of AIFMD). Does the AIFM have to include the full set of documentation required by Articles 32 or 33 in the notification letter?

Answer 7: Yes. Material changes to existing notifications require the AIFM to hand in a full set of documentation with the revised notification letter. AIFMs are asked to highlight any amendment to the original notification letter and accompanying documentation.

Question 8 [last update: 6 April 2017]: In addition to the AIFMD categories of “professional investor” and “retail investor”, a number of Member States have introduced further categories for retail investors (such as “qualifying investor”, “informed investor”, or “semi-professional investor”), which, by their definition, share some, but not all elements of the definition of “professional investor” pursuant to Article 4(1)(ag) of AIFMD. Does the AIF marketing passport (Article 32 of AIFMD) extend to those investors?

Answer: No. The AIF marketing passport may only be used for marketing to professional investors as defined in Article 4(1)(ag) of AIFMD. Any other cross-border marketing activity to non-professional investors as defined in Member States has to be notified and carried out according to national legislation in the host Member State of the AIF and cannot be carried out by way of the AIF marketing passport.

Question 9 [Last update: 13 June 2023] [QA 1069]: Where an investment strategy is developed by a third party (the fund initiator), are the obligations set out in Article 30a of the AIFMD applicable to this third party?

Answer: *Answer provided by the European Commission in accordance with Article 16b(5) of the ESMA Regulation*¹¹

Yes. Pursuant to Article 30a(3) AIFMD, pre-marketing can be conducted by the EU AIFM or by a third party on behalf of an authorised EU AIFM only if that third party is authorised as an investment firm in accordance with Directive 2014/65/EU, as a credit institution in accordance with Directive 2013/36/EU, as a UCITS management company in accordance with Directive 2009/65/EC, as an AIFM in accordance with AIFMD, or acts as a tied agent in accordance with Directive 2014/65/EU. Moreover, such third party is subject to the conditions for pre-marketing set out in Article 30a AIFMD.

Question 10 [Last update: 13 June 2023] [QA 1070]: Are registered AIFMs referred to in Article 3(2) of the AIFMD, which do not qualify as EuSEF manager or EuVECA manager, subject to the obligation to notify pre-marketing pursuant to Article 30a(1) of the AIFMD?

¹¹ The answers provided by the European Commission clarify provisions already contained in the applicable legislation. They do not extend in any way the rights and obligations deriving from such legislation nor do they introduce any additional requirements for the concerned operators and competent authorities. The answers are merely intended to assist natural or legal persons, including competent authorities and Union institutions and bodies in clarifying the application or implementation of the relevant legal provisions. Only the Court of Justice of the European Union is competent to authoritatively interpret Union law. The views expressed in the internal Commission Decision cannot prejudice the position that the European Commission might take before the Union and national courts.

Answer: Answer provided by the European Commission in accordance with Article 16b(5) of the ESMA Regulation¹²

No, unless it is required otherwise under national rules. Article 30a AIFMD applies to the authorised EU AIFMs. Sub-threshold EU AIFMs covered by Article 3(2) AIFMD, which have not opted in under Article 3(4) AIFMD, are referred to as registered AIFMs in AIFMD, which do not have the EU-wide AIFM passport to exert asset management activities across the borders. Except for Article 3(3) and (4) and Article 46 AIFMD activities of sub-threshold EU AIFMs are governed by the national rules, including those on pre-marketing.

Question 11 [Last update: 13 June 2023] [QA 1071]: In case there are no investors in a host Member State, do AIFMs wishing to de-notify the arrangements previously made for marketing the units or shares of the EU AIFs they manage have to comply with the obligations set out in Article 32a(1) of the AIFMD?

Answer: Answer provided by the European Commission in accordance with Article 16b(5) of the ESMA Regulation¹³

Yes. Article 32a(1), point (a), AIFMD lays down an explicit exemption referring to closed-ended European long-term investment funds governed by Regulation (EU) 2015/760. In all other cases not covered by that exemption, all the conditions laid down in Article 32a(1) AIFMD are to be complied with, making sure that there are no investors uninformed about the AIFM's market exit, that all marketing is publicly terminated and any marketing arrangements with the third parties are terminated or modified to prevent any further marketing of the de-notified AIF. Finally, Article 32a(1), second subparagraph, AIFMD remains applicable. That provision requires the AIFM to cease any new or further marketing of units or shares of the AIF it manages in the Member State in respect of which it has submitted a de-notification.

¹² The answers provided by the European Commission clarify provisions already contained in the applicable legislation. They do not extend in any way the rights and obligations deriving from such legislation nor do they introduce any additional requirements for the concerned operators and competent authorities. The answers are merely intended to assist natural or legal persons, including competent authorities and Union institutions and bodies in clarifying the application or implementation of the relevant legal provisions. Only the Court of Justice of the European Union is competent to authoritatively interpret Union law. The views expressed in the internal Commission Decision cannot prejudice the position that the European Commission might take before the Union and national courts.

¹³ The answers provided by the European Commission clarify provisions already contained in the applicable legislation. They do not extend in any way the rights and obligations deriving from such legislation nor do they introduce any additional requirements for the concerned operators and competent authorities. The answers are merely intended to assist natural or legal persons, including competent authorities and Union institutions and bodies in clarifying the application or implementation of the relevant legal provisions. Only the Court of Justice of the European Union is competent to authoritatively interpret Union law. The views expressed in the internal Commission Decision cannot prejudice the position that the European Commission might take before the Union and national courts.

Section III: Reporting to national competent authorities under Articles 3, 24 and 42

Date last updated: 28 May 2021

Question 1 [last update 16 December 2016]: When a non-EU AIFM reports information to the national competent authorities of a Member State under Article 42 of the AIFMD, which AIFs have to be included in the reports?

Answer 1: When a non-EU AIFM reports information to the national competent authorities of a Member State under Article 42, only the AIFs marketed in that Member State have to be taken into account for the purpose of the reporting. When Member States apply ESMA's [opinion](#) on collection of additional information under Article 24(5) of the AIFMD, AIFMs should also report information on non-EU master AIFs not marketed in the EU that have either EU feeder AIFs or non-EU feeder AIFs marketed in the Union under Article 42. Non-EU AIFMs should apply the same principle if the master AIF is established in the Union and not marketed in the Union (i.e. they should report information on the EU master AIF not marketed in the Union).

Question 2 [last update 25 March 2014]: Should repurchase transactions (at the level of the portfolio of the AIF) by or on behalf of a reporting AIF be considered as financing operations for the purpose of the AIFMD reporting obligations (questions 54 – 56 and 210- 217 of the consolidated reporting template)?

Answer 2: Yes. Therefore, AIFMs should take into account the counterparties of those transactions when reporting the information related to funding sources in questions 54 – 56 and take into account the aggregate amount of these transactions in questions 210-217.

Question 3 [last update 25 March 2014]: Which period should AIFMs use when reporting information on 'Instruments traded and individual exposures' (questions 121 to 124 of the consolidated reporting template): the residual maturity of the instrument or the maturity at issuance?

Answer 3: AIFMs should use the residual maturity as of the reporting date.

Question 4 [last update 25 March 2014]: What should be the basis of the numerator for calculating the geographical exposure as a percentage of the NAV of the AIF (question 78 to 85 of the consolidated reporting template)?

Answer 4: The numerator used for calculating the geographical exposure as a percentage of the net asset value of the AIF should be the NAV of the AIF for each geographical area. Therefore, this may result in negative values for certain regions but the total should equal 100%.

Question 5 [last update 25 March 2014]: What should be the basis of the numerator and the denominator for calculating the geographical exposure as a percentage of the aggregated value of the AIF (questions 86 to 93 of the consolidated reporting template)?

Answer 5: The numerator used for calculating the geographical exposure as a percentage of the aggregated value of the AIF should be the total value of assets under management of the AIF for each geographical area. The basis for the denominator should be the total value of assets under management of the AIF. The total should equal 100%.

Question 6 [last update 25 March 2014]: What should be the basis of the numerator for calculating the breakdown of investment strategies as a percentage of the NAV of the AIF (question 60 of the consolidated reporting template)?

Answer 6: The numerator used for calculating the breakdown of investment strategies as a percentage of the NAV of the AIF should be the net asset value of the AIF for each investment strategy. Therefore, this may result in negative values for certain investment strategies but the total should equal 100%.

Question 7 [last update 25 March 2014]: ESMA's guidelines recommend that AIFMs submit the last report of the AIF immediately after it has been liquidated or put into liquidation. When should AIFMs submit this last report?

Answer 7: AIFMs should submit the last AIF report not later than one month after the end of the quarter in which the AIF has been liquidated or put into liquidation.

Question 8 [last update 25 March 2014]: How should AIFMs calculate the percentage of market value for securities traded on regulated markets and OTC markets (questions 148 and 149 of the consolidated reporting template)?

Answer 8: AIFMs should aggregate the market value of all securities traded and report the percentage of the market value of securities traded on a regulated exchange and OTC. Regulated exchanges include regulated markets, multilateral trading facilities and organised trading facilities. For the European Union, regulated markets¹⁴ and multilateral trading facilities¹⁵ are published on ESMA's website. Securities that are not traded on regulated exchanges should be considered as traded OTC. This means that the total should equal 100%.

Question 9 [last update 25 March 2014]: How should AIFMs calculate the percentage of trade volumes for derivatives traded on regulated markets and OTC markets (questions 150 and 151 of the consolidated reporting template)?

Answer 9: AIFMs should take into account the total number of trades and report the percentage of number of trades on a regulated exchange and OTC. Regulated exchanges include regulated markets, multilateral trading facilities and organised trading facilities. For the

¹⁴ http://mifidatabase.esma.europa.eu/Index.aspx?sectionlinks_id=23&language=0&pageName=REGULATED_MARKETS_Display

¹⁵ http://mifidatabase.esma.europa.eu/Index.aspx?sectionlinks_id=22&language=0&pageName=MTF_Display

European Union, regulated markets¹⁶ and multilateral trading facilities¹⁷ are published on ESMA's website. Securities that are not traded on regulated exchanges should be considered as traded OTC. This means that the total should equal 100%.

Question 10 [last update 25 March 2014]: How should AIFMs report the information on the liquidity portfolio when the AIF is invested in assets with no current liquidity for which it is not possible to determine the future liquidity (questions 178 -184 of the consolidated reporting template)?

Answer 10: In that case, AIFMs should adopt a conservative approach and assign the instrument to the longest period bucket.

Question 11 [last update 25 March 2014]: How should AIFMs report the information on investor liquidity?

Answer 11: AIFMs should divide the AIF's NAV among the period buckets depending on the shortest period within which investors are entitled, under the fund documents, to withdraw invested funds or receive redemption payments, as applicable.

For example, an AIF has a NAV of € 1,000,000 with two investors. According to the fund documents, investor A whose share of the NAV is €600,000 is entitled to withdraw 50% of its investment on a daily basis and 50% of its investments between 2 and 7 days. Investor B, whose share of the NAV is €400,000, is entitled to withdraw 60% of its investments between 31 and 90 days and 40% of its investment within 91 and 180 days. The investor profile of the AIF will be the following:

1 day or less	2-7 days	8-30 days	31-90 days	91-180 days	181-365 days	More than 365 days
30%	30%	0	24%	16%	0	0

Question 12 [last update 25 March 2014]: According to question 22 of the consolidated reporting template, AIFMs must indicate the inception date of the AIF. What does inception date mean?

Answer 12: If an AIF is subject to pre-authorization, the inception date should be the date of authorisation. If an AIF is established without pre-authorization by the competent authority, the inception date should be the date when the AIF was established. Finally, if the AIF is subject to registration obligation at national level with its competent authority after the date of establishment, the inception date should be the date when the AIF was constituted.

Question 13 [last update 25 March 2014]: Should AIFMs report the information in English or in the language of the jurisdiction to which they report?

Answer 13: Apart from the sections on assumptions and stress tests, where text is allowed, the rest of the information to be reported will consist of figures, predetermined values or names of counterparties. For assumptions and stress tests, ESMA recommends that the national competent authority allow AIFMs to report the information in English, which would allow multinational groups to centralise and harmonise their AIFMD reporting. However, this will depend on the national legislation transposing the AIFMD.

Question 14 [last update 25 March 2014]: There are predetermined codes for the XML filing. Should these codes be translated into national languages?

Answer 14: No. These codes are predetermined values that cannot be changed for the XML filing.

Question 15 [last update 25 March 2014]: Is cash resulting from repurchase agreements included in the amount of cash and cash equivalents to be reported by AIFMs under questions 121 -124?

Answer 15: Yes. When reporting information on cash and cash equivalents, AIFMs should include all amounts of cash held, including as a result of repurchase arrangements.

Question 16 [last update 25 March 2014]: According to questions 163 and 164 of the consolidated reporting template, AIFMs should report the BIC and LEI of the five biggest counterparties to which an AIF has exposure. How should AIFMs identify those counterparties if they do not have such codes?

Answer 16: In that case, AIFMs should only report the full name of the counterparty.

Question 17 [last update 25 March 2014]: What information should AIFMs report for question 137 of the consolidated reporting template when they do not have an expected annual return/IRR in normal market conditions?

Answer 17: In that case, AIFMs should report the value 'N/A' for non-applicable.

Question 18 [last update 25 March 2014]: Must all AIFMs answer questions 296 to 301 of the consolidated reporting template?

Answer 18: No. Only AIFMs managing AIFs employing leverage on a substantive basis must answer questions 296 to 301 of the consolidated reporting template.

Question 19 [last update 27 June 2014]: Pursuant to questions 19 of the consolidated reporting template for AIF-specific information and 20 of the consolidated reporting template

for AIFM-specific information, AIFMs must specify whether the AIFs and the AIFMs are EEA AIFs and EEA AIFMs. Which countries are covered by the reference to “EEA”?

Answer 19: EEA AIFs and EEA AIFMs should be understood as AIFs and AIFMs established in one of the 28 EU Member States or Iceland, Norway and Liechtenstein.

Question 20 [last update 27 June 2014]: According to Article 24(2) of the AIFMD, AIFMs must report specific information for all EU AIFs they manage or AIFs they market in the Union. Which countries are covered by the reference to “the Union”?

Answer 20: The reference to the Union should be understood as including the 28 EU Member States and, once the AIFMD has been incorporated into the EEA agreement, Norway, Iceland and Liechtenstein.

Question 21 [last update 27 June 2014]: The technical guidance indicates for each information item whether the information is mandatory (M), optional (O) or conditional (C). What do these categories mean?

Answer 21: Information marked as mandatory should be reported by all AIFMs. Information marked as optional has to be reported if the AIFM has information to report. For example, question 10 of the reporting template (change in AIF reporting obligation frequency code) is marked as optional. This means that AIFMs should report this information if the reporting code has changed compared to the previous reporting. Information marked as conditional is linked to other information (flags) in the reporting template. If those flags are answered with “Yes”, the corresponding conditional information has to be reported. However, if those flags are answered with “No”, the corresponding conditional information should not be reported. For example, if the question 41 (master feeder flag) is answered with “Yes”, AIFMs should indicate in field 42 the name of the master AIFs.

Question 22 [last update 21 July 2014]: How should AIFMs calculate the percentage of trade volumes for derivatives cleared by a CCP and bilaterally (questions 152 and 153 of the consolidated reporting template)?

Answer 22: AIFMs should take into account the total number of trades and report the percentage of number of trades cleared by a CCP and bilaterally. The total should equal 100%.

Question 23 [last update 21 July 2014]: How should AIFMs calculate the percentage of market value for repo trades cleared by a CCP, bilaterally or on a tri-party basis (questions 154 and 156 of the consolidated reporting template)?

Answer 23: AIFMs should aggregate the market value of all repo trades and report the percentage of the market value of repo trades cleared by a CCP, bilaterally or on a tri-party basis. The total should equal 100%.

Question 24 [last update 21 July 2014]: How should AIFMs classify FX spot trades when answering questions such as on individual exposures (questions 121 to 124 of the consolidated reporting template for AIF-specific information) or value of turnover in each asset class over

the reporting period (questions 125 to 127 of the consolidated reporting template for AIF-specific information)?

Answer 24: When reporting information other than value of turnover, AIFMs should classify FX spot trades as '*other cash equivalent (excluding government securities)*' with the sub-asset type code 'SEC_CSH_OTHC'. When reporting information on value of turnover, AIFMs should classify FX spot trades as '*other cash equivalent*' with the sub-asset type code 'SEC_CSH_CSH'.

Question 25 [last update 21 July 2014]: AIFMs have to report value of turnover in each asset class over the reporting period (questions 125 to 127 of the consolidated reporting template for AIF-specific information). What information should AIFMs report for these questions when no trades took place during the reporting period?

Answer 25: AIFMs should use the field '*total other*' with the sub-asset type code 'OTH_OTH_OTH' and report '0'.

Question 26 [last update 21 July 2014]: How should AIFMs classify cross-currency interest swaps when answering questions such as those on individual exposures (questions 121 to 124 of the consolidated reporting template for AIF-specific information) or value of turnover in each asset class over the reporting period (questions 125 to 127 of the consolidated reporting template for AIF-specific information)?

Answer 26: When reporting information other than value of turnover, AIFMs should classify cross-currency interest swaps as '*interest rate derivatives*' with the sub-asset type code 'DER_IRD_INTR'. When reporting information on value of turnover, AIFMs should classify cross-currency interest swaps as '*interest rate derivatives*' with the sub-asset type code 'DER_IRD_IRD'.

Question 27 [last update 11 November 2014]: When answering questions 148 and 149 of the consolidated reporting template, should AIFMs include repo and reverse repurchase agreements?

Answer 27: Yes, but AIFMs should only include securities received by the AIFs.

Question 28 [last update 21 July 2014]: How should AIFMs managing AIFs holding cash report the breakdown of investment strategies?

Answer 28: When the holding of cash is part of a strategy such as a CTA¹⁸ strategy, AIFMs should not report cash separately. For example, an AIF with a CTA strategy representing 70% of its NAV, out of which 30% of the NAV is made up of cash at the time of the reporting date, should allocate 70% of its NAV to the CTA strategy.

¹⁸ A commodity trading advisor (CTA) generally acts as an asset manager, following a set of investment strategies utilizing futures contracts and options on futures contracts on a wide variety of underlying instruments.

If the holding of cash is not part of an investment strategy, AIFMs should use the strategy 'other' of the predominant AIF type selected and report the corresponding percentage of the NAV held in cash. AIFMs should also use the field 'description' to make it clear that the field 'other' is made up of cash.

Question 29 [last update 21 July 2014]: Question 6 above clarifies that negative values can be reported for investment strategies. How should AIFMs report information on investment strategies with negative values?

Answer 29: AIFMs should allocate the status of predominant AIF type to the strategy with the highest absolute percentage of the NAV. The predominant AIF type 'multi-strategy hedge fund' should be used when no strategy has an absolute value greater than 50% of the NAV.

Question 30 [last update 21 July 2014]: Should AIFMs consider bank overdrafts as funding sources?

Answer 30: Yes.

Question 31 [last update 21 July 2014]: Pursuant to Article 111 of the implementing Regulation, leverage shall be considered to be employed on a substantial basis when the exposure of an AIF, as calculated according to the commitment method, exceeds three times its NAV. How should AIFMs assess this limit?

Answer 31: AIFs should be considered as employing leverage on a substantial basis if, over the reporting period, the average daily calculation of the exposure as calculated according to the commitment method exceeds three times the average daily calculation of the NAV. If the exposure is calculated less frequently than daily, AIFs should be considered as employing leverage on a substantial basis where, at least once during the reporting period, the exposure as calculated according to the commitment method exceeds three times its NAV.

Question 32 [last update 21 July 2014]: How should AIFMs managing AIFs with multiple share classes identify the AIFs?

Answer 32: AIFMs reporting information for AIFs with multiple share classes should answer questions 24 and questions 30 to 40 of the consolidated reporting template.

For AIFs with only one share class, AIFMs should only answer questions 24 to 33 of the consolidated reporting template.

Question 33 [last update 21 July 2014]: In question 282 of the consolidated reporting template, should AIFMs report the percentage of collateral posted to all counterparties that has been re-hypothecated as of the last business day of the reporting period or during the reporting period?

Answer 33: AIFMs should report the percentage of the market value of the collateral that has been re-hypothecated during the reporting period. This percentage should be the ratio of the aggregated market value of the collateral re-hypothecated during the reporting period by all

counterparties over the aggregated market value of all the collateral posted by AIFMs to all counterparties.

Question 34 [last update 21 July 2014]: What information should AIFMs report under questions 283 to 286 of the consolidated reporting template?

Answer 34: For questions 283, 284, 285 and 286, AIFMs should aggregate the market value of cash and securities borrowed.

Question 35 [last update 21 July 2014]: In which currency should AIFMs report information on the five principal markets and five principal instruments in which they trade (questions 29 and 32 of the consolidated reporting template for AIFM-specific information)?

Answer 35: AIFMs should report this information in Euro.

Question 36 [last update 30 September 2014]: A non-EU AIFM markets its AIFs in the Union under Article 42 of the AIFMD. Should the AIFM continue to report to the national competent authorities of the Member States in which it markets its AIFs after the marketing period of the AIF has ended?

Answer 36: For non-EU AIFMs marketing their AIFs in the Union under Article 42 of the AIFMD, the reporting obligations to national competent authorities does not depend on the actual marketing period of the AIF but rather on the existence of investors in the AIF in the jurisdiction of the authority concerned.

Therefore, non-EU AIFMs should continue to report to national competent authorities after the marketing period has ended unless they confirm that no investors in the jurisdiction of the authority concerned are invested in the AIFs.

Question 37 [last update 26 March 2015]: A non-EU AIFM markets its AIFs in several Member States under Article 42 of the AIFMD. Should the AIFM calculate a reporting frequency for each Member State where it markets its AIFs or should the AIFM calculate a unique reporting frequency for all Member States in which it markets its AIFs?

Answer 37: According to Article 110 of the implementing Regulation, AIFMs shall take into account all the EU AIFs they manage and AIFs they market in the Union to calculate the reporting frequency. The AIFM should therefore calculate a unique reporting frequency taking into account all the AIFs it markets in the Union and apply the same reporting frequency to all Member States where it markets its AIFs.

Similarly, the assets under management in questions 33 and 34 of the consolidated reporting template for AIFM-specific information should be based on all the AIFs marketed in the Union by a non-EU AIFM and not on the AIFs marketed by a non-EU AIFM in a particular Member State. This means that non-EU AIFMs should report the same amount of assets under management to all NCAs to which they report under Article 42 of the AIFMD.

Question 38 [last update 30 September 2014]: Should AIFMs use the NAV when they report information under questions 48 and 86 to 93 of the consolidated reporting template for AIF-specific information?

Answer 38: No. AIFMs should use the total value of assets under management calculated in accordance with Article 2 of the implementing Regulation. In addition, if the national competent authorities to which they report have decided to apply ESMA's opinion on collection of information under Article 24(5), AIFMs should also use the total value of assets under management for questions 86 to 93 of the consolidated reporting template for AIF-specific information.

Question 39 [last update 30 September 2014]: How should AIFMs calculate the value of the five main instruments in which the AIF is trading (question 76 of the consolidated reporting template for AIF-specific information)?

Answer 39: AIFMs should calculate the values according to Article 2 of the implementing Regulation and not according to Article 3 of the AIFMD as stated in Annex IV of the implementing Regulation.

Question 40 [last update 30 September 2014]: According to Article 110 of the implementing Regulation, AIFMs shall report to national competent authorities no later than 30 days or 45 days for fund of funds after the end of the reporting period. What should AIFMs do if the final NAV of the AIFs for which they report is not available by this deadline or is no longer representative?

Answer 40: In that situation, AIFMs should use estimates of the NAV of the AIFs and send updates afterwards if there is a difference between the estimated NAV and the final NAV.

Question 41 [last update 30 September 2014]: Should the position type (Long or Short) in relation to a derivative instrument be determined by reference to the derivative contract or by reference to the exposure to the underlying of the derivative instrument (questions 75, 97, 105, 123, 124, 129 and 130 of consolidated reporting template for AIF-specific information)?

Answer 41: The position type should be determined by reference to the exposure to the underlying of the derivative instrument. As a result, a long position on a put option should be reported as 'Short' whereas a short position on a put option should be reported as 'Long'.

Question 42 [last update 30 September 2014]: Should AIFMs take into account the settlement period when they report information on portfolio liquidity (questions 178 to 184 of the consolidated reporting template for AIF-specific information)?

Answer 42: AIFMs should adopt a conservative approach when they report information on the portfolio liquidity. As a consequence, AIFMs should take into account the time delay for having the proceeds of the sale available on a cash account if it has as a non-negligible impact on the liquidity profile of the AIF.

Question 43 [last update 30 September 2014]: Should AIFMs include cash accounts when reporting information on the total number of open positions (question 218 of the consolidated reporting template for AIF specific information)?

Answer 43: Yes, AIFMs should take into account all cash accounts that exist.

Question 44 [last update 30 September 2014]: What value should AIFMs use to report information on the value of securities borrowed for short positions (question 289 of the consolidated reporting template for AIF-specific information)?

Answer 44: AIFMs should use the market value of the securities borrowed.

Question 45 [last update 30 September 2014]: Should AIFMs report information on turnover of financial derivative instruments based on both market values and notional values (questions 126 and 127 of the consolidated reporting template for AIF-specific information)?

Answer 45: Yes.

Question 46 [last update 30 September 2014]: How should AIFMs treat bank overdrafts for the purpose of information on individual exposures (questions 123 and 124 of the consolidated reporting template)?

Answer 46: AIFMs should treat bank overdrafts as short positions in 'Cash and Cash Equivalent'.

Question 47 [last update 11 November 2014]: AIFMs shall report the value of collateral and other credit support posted to all counterparties (questions 157 to 159 of the consolidated reporting template). Should AIFMs include collateral passed to a clearing member for transmission to a CCP in these questions?

Answer 47: Yes.

Question 48 [last update 11 November 2014]: How should AIFMs calculate the turnover expressed in notional value for derivative instruments (question 127 of the consolidated reporting template)?

Answer 48: AIFMs should convert the derivative positions into an equivalent position in the underlying assets as prescribed in Article 10 and Annex II of the implementing Regulation using the value at the date of the trade and not at the reporting date.

Question 49 [last update 11 November 2014]: In which categories should AIFMs allocate sovereign bonds which fall in the categories '*Non-G10 with 0-1 year/1year+ term to maturity*' and also in the categories '*EU bonds with 0-1 year/1 year + term to maturity*'?

Answer 49: AIFMs should allocate those sovereign bonds to the categories '*EU bonds with 0-1 year/1 year + term to maturity*'.

Question 50 [last update 9 January 2015]: How should AIFMs report information on subscriptions and redemptions over the reporting period (questions 255 to 278 of the consolidated reporting template)?

Answer 50: AIFMs should report the value of subscription and redemption orders and not the number of subscription and redemption orders. Information should be reported for the month of the cash-flows and not for the month of the subscription and redemption orders unless it is the same month.

For example, an AIFM is subject to quarterly reporting obligations and investors can subscribe/redeem 4 times per year on the NAVs of 31/03, 30/06, 30/09 and 31/12 of each year. The AIFM receives for January 100 redemption orders, for February 200 redemption orders and for March 50 redemption orders (350 redemption orders in total over the reporting period Q1). Redemption orders are executed in April on the NAV calculated on 31 March. The NAV is €100 per share. Therefore, the AIFM will report redemption orders for a total value of €35,000 (350*100) in April (reporting for Q2).

Question 51 [last update 9 January 2015]: How should AIFMs report information on the change in NAV per month (questions 243 to 254 of the consolidated reporting template)?

Answer 51: The change in NAV captures both the change due to subscriptions and redemptions and the change due to investment performance. It is the net effect on the fund's NAV over the given reporting period after all inflows, outflows and performance are taken into account. AIFMs should report information on the change in NAV for each month of the reporting period. If no official NAV is available for the calculation, AIFMs should use estimates of the NAV. In some cases (e.g. for AIFs investing in illiquid assets), the best estimate may be the previous NAV.

Question 52 [last update 9 January 2015]: How should AIFMs report information on the percentage of gross and net investment returns per month (questions 219 to 242 of the consolidated reporting template)?

Answer 52: AIFMs should report the information for each month of the reporting period. If no official NAV is available for the calculation, AIFMs should use estimates of the NAV. In some cases (e.g. for AIFs investing in illiquid assets), the best estimate may be the previous NAV.

Question 53 [last update 9 January 2015]: An AIFM manages both funds and funds of funds. When should the AIFM report aggregated information at the level of the AIFM (AIFM file of the consolidated reporting template)?

Answer 53: In that case, the AIFM should report aggregated information at the level of the AIFM and on funds of funds no later than 45 days after the end of the reporting period. Information on AIFs that do not take the form of fund of funds should be reported 1 month after the end of the reporting period as required by Article 110 of the implementing Regulation.

Question 54 [last update 26 March 2015]: How should AIFMs report information on the total long and short value of exposures before currency hedging (questions 128 to 130 of the consolidated reporting template)?

Answer 54: AIFMs should report information on long and short value of exposures for all the sub-asset types of questions 122 to 124 of the consolidated reporting template. The information should be provided in the base currency of the AIF. This means that the sum of the short and long value of exposures in questions 129 and 130 should equal the sum of the questions 122 to 124.

Question 55 [last update 26 March 2015]: Should non-EU AIFMs marketing their AIFs in the Union under Article 42 of the AIFMD report the results of stress tests under Articles 15 and 16 of the AIFMD (questions 279 and 280 of the consolidated reporting template)?

Answer 55: Non-EU AIFMs marketing their AIFs in the Union under Article 42 of the AIFMD should report the results of stress tests insofar as this is required by the national private placement regime of the Member States where they market their AIFs or if the non-EU AIFMs have carried out such stress tests.

Question 56 [last update 12 May 2015]: How do the reporting obligations apply to AIFMs that are sister companies and that are owned by another AIFM?

Answer 56: The reporting obligations apply to each individual AIFM for the AIFs they manage and/or market in the Union. This means that each AIFM should report individually to the competent authorities of their home Member State according to their own reporting frequency as calculated pursuant to Article 110 of the implementing Regulation.

Question 57 [last update 12 May 2015]: Should AIFMs consider commitments or actual capital drawdowns when they report information on subscriptions over the reporting period for AIFs pursuing private equity strategies (questions 255 to 266 of the consolidated reporting template)?

Answer 57: AIFMs should consider actual capital drawdowns and not commitments when they report information on subscriptions for AIFs pursuing private equity strategies.

Question 58 [last update 12 May 2015]: What are the reporting obligations for a registered AIFM that decides to opt in under the Directive?

Answer 58: Once a registered AIFM has opted in under the Directive it has to comply with the Directive in its entirety. Therefore, an AIFM that has opted in has to report to its national competent authorities the information listed in Article 24 of the Directive. However, the fact that the AIFM has opted into the Directive does not impact the reporting frequency. Indeed, the AIFM should continue to report on an annual basis to its national competent authorities.

However, if at a later stage the total value of assets under management of the AIFM that has opted in exceeds the thresholds of Article 110 of the implementing Regulation, the AIFM will have to report on a more frequent basis to its national competent authorities.

In certain Member States, all AIFMs have to be authorised under the Directive. Therefore, in these jurisdictions, AIFMs whose total value of assets under management is under the thresholds of Article 3(2)(a) and (b) of the Directive have to report to their national competent authorities the information listed in Article 24 of the Directive.

Question 59 [last update 12 May 2015]: What information should a non-EU AIFM whose total value of assets under management does not exceed the thresholds of Article 3(2)(a) and (b) of the Directive and that markets its AIFs in the Union under a national private placement regime report to the competent authorities?

Answer 59: Article 3 of the AIFMD does not make any distinction between EU AIFMs and non-EU AIFMs. Therefore, non-EU AIFMs whose total value of assets under management does not exceed the thresholds of Article 3(2)(a) and (b) and that market their AIFs in the Union under a national private placement regime should at least report to the competent authorities where they market their AIFs the information listed in Article 3(3)(d) of the Directive. Indeed, the national private placement regimes of the Member States where the non-EU AIFM markets its AIFs may require non-EU AIFMs to report additional information.

Question 60 [last update 12 May 2015]: What information should an AIFM report for questions 128 to 130 of the consolidated reporting template when an AIF invests exclusively in assets denominated in the base currency of the AIF?

Answer 60: The AIFM should report the long and short positions in the base currency of the AIF.

Question 61 [last update 12 May 2015]: Should AIFMs consider distribution of dividends to investors as redemptions for the purpose of questions 267 to 278 of the consolidated reporting template?

Answer 61: No.

Question 62 [last update 12 May 2015]: Should AIFMs always apply the same reporting frequency to AIFs that are sub-funds of the same umbrella AIFs?

Answer 62: No. The reporting frequency of an AIF is not affected by the legal structure of the AIF. Each AIF, being sub-funds of the same umbrella AIFs or not, has to be treated separately for the purpose of the reporting obligations (including for the reporting frequency).

Question 63 [last update 12 May 2015]: Should AIFMs take into account cash and cash equivalents for the purpose of the main instruments in which the AIF is trading (questions 64 to 77 of the consolidated reporting template), the principal exposures of the AIF (questions 94 to 102 of the consolidated reporting template) and the five most important portfolio concentrations (questions 103 to 112 of the consolidated reporting template)?

Answer 63: Yes.

Question 64 [last update 12 May 2015]: What should be the procedure for the first reporting on AIFs?

Answer 64: The procedure should be the same procedure as for the first reporting on AIFMs. This procedure is detailed in paragraphs 11 to 13 of ESMA's guidelines on reporting obligations under Articles 3(3)(d) and 24 (1), (2) and (4) of the AIFMD.

Question 65 [last update July 2017]: How should AIFMs convert the total value of assets under management into Euro?

Answer 65: First of all, AIFMs should use the rounded values of the AIFs in the base currency of the AIFs. Then, AIFMs should divide these rounded values by the corresponding rate of one unit of the base currency in Euros. For example, if the base currency of an AIF, reporting for 31 March 2015, is the US dollar and is using the ECB rate, AIFMs should multiply the rounded value in US dollar of the AIF by 0.9312, which was the spot rate on that date.

AIFMs should report the rounded values in Euro and in the base currency in questions 33 and 34 of the consolidated reporting template for AIFM-specific information and in question 48 in Euro of the consolidated reporting template for AIF-specific information. AIFMs should also report the value of the exchange rate used for the conversion in question 37 of the consolidated reporting template for AIFM-specific information and in question 50 of the consolidated reporting template for AIF-specific information.

Question 66 [last update 21 July 2015]: Question 64 above clarifies that the procedure for first reporting of AIFs should be the same procedure as for first reporting of AIFMs as laid down in ESMA's guidelines on reporting obligations. This means that AIFMs should not report any information on AIFs for the reporting period during which the AIFs were created. However, should AIFMs include AIFs created during the reporting period in the total value of assets under management of the AIFM for that reporting period?

Answer 66: Yes. This means that the total value of assets under management at the level of the AIFM at the reporting date (question 33 of the consolidated reporting template for AIFM-specific information) will not be the sum of the values of assets under management of the AIFs reported for that reporting period.

Question 67 [last update 02 December 2015]: According to questions 54 to 56 and 210 to 217 of the consolidated reporting template, AIFMs have to report on the jurisdictions of the three main funding sources (excluding units or shares of the AIF bought by investors) as well as on the aggregate amount of borrowing and cash financing. Should AIFMs include all liquidity that is made available to the AIF (including the cash received in the context of securities lending transactions and repurchase transactions), unless it originates from the payment of subscriptions related to units or shares of the AIF bought by investors?

Answer 67: Yes.

Question 68 [last update 02 December 2015]: According to questions 121 to 124 of the reporting template for AIF-specific information, AIFMs have to categorise loans as either

leveraged or other loans. ESMA guidelines provide that where a loan is syndicated the loan should be classified as 'other'. How should a leveraged syndicated loan be classified for the purpose of completion of these questions?

Answer 68: To ensure consistency of reporting all leveraged loans, whether syndicated or otherwise, should be disclosed as leveraged loans.

Question 69 [last update 02 December 2015]: According to question 285 of the reporting template for AIF-specific information, AIFMs shall report information on collateralised/secured cash borrowing – via (reverse) repo. Should AIFMs report cash from repurchase agreements as cash borrowings?

Answer 69: Yes.

Question 70 [last update 02 December 2015]: Question 66 clarifies that newly created AIFs should be included in the total AUM of the AIFM at the reporting date (question 33 of the reporting template for AIFM-specific information). Should information on newly created AIFs also be included in questions 26 to 32 of the reporting template for AIF-specific information?

Answer 70: No. Information on the newly created AIF(s) should only be included in the total AUM of the AIFM as reported at question 33 of the reporting template for AIFM-specific information.

Question 71 [last update 02 December 2015]: According to Article 2(4) of the implementing Regulation, AIFMs may exclude investments of AIFs in other AIFs they manage for the purpose of calculating the total value of assets under management. Does ESMA expect AIFMs to exclude such investments from the calculation of the total value of assets under management?

Answer 71: Yes. In order to ensure the comparability of the results at an EU level, it is important that AIFMs calculate their total value of assets under management in the same manner. In situations where feeder AIFs invest in master AIFs and where these are managed by the same AIFM, it is important to ensure that there is no duplication of assets under management.

Question 72 [last update 02 December 2015]: When reporting information on their investment strategies, should AIFMs report the investment strategy that corresponds to their portfolio of assets as at the reporting date or should they indicate the investment strategy that is disclosed to investors in the fund rules or other offering documents?

Answer 72: AIFMs should report the investment strategy that is disclosed to investors in the fund rules or other offering documents.

Question 73 [last update 02 December 2015]: How should AIFMs determine the geographical focus of assets in which they invest such as stocks, bonds or financial derivatives (questions 78 to 85 of the consolidated template for AIF-specific information)?

Answer 73: AIFMs should take into account the domicile of the company/entity to which the AIFs have an exposure. For example, if an AIF invests in a stock of a company domiciled in

Europe but traded in the US, the corresponding geographical area would be Europe and not North-America. Similarly, an AIF that invest in a bond issued in the US market by a company domiciled in the Europe should select Europe. For financial derivative instruments such as options, AIFMs should look at the financial instrument underlying the financial derivative instruments and apply the same approach as for stocks and bonds.

Question 74 [last update 02 December 2015]: Is information on gross and net investment returns, change in NAV, subscriptions and redemptions mandatory or optional?

Answer 74: This information is mandatory for Article 24(2) AIF reporting contents but, to enable the necessary functional flexibility, it is classified as optional from a technical standpoint. This information is optional from a technical standpoint because AIFMs only have to report this information for the months corresponding to the reporting period for which they report. For example, an AIFM that reports on quarterly basis will report in Q2 only information for April, May and June and not for January, February and March. Information on January, February and March would have been part of the report for Q1.

Question 75 [last update 02 December 2015]: When reporting information on leverage, should AIFMs report a ratio or a percentage?

Answer 75: AIFMs should report a percentage.

Question 76 [last update 02 December 2015]: When reporting the investment strategy of a feeder AIF, should AIFMs look through the master AIF?

Answer 76: ESMA expects that in most instances, feeder AIFs will have the same investment strategy as the master AIF unless the investments made by the feeder AIF in other assets make the resulting strategy different.

Question 77 [last update 02 December 2015]: Should AIFMs include master/feeder structures when answering questions 290 to 293 of the consolidated template for AIF-specific information?

Answer 77: No.

Question 78 [last update 02 December 2015]: Is information on liquidity profile mandatory or optional (questions 178 to 192 of the reporting template for AIF-specific information)?

Answer 78: This information is mandatory.

Question 79 [last update 02 December 2015]: What information should AIFMs communicate when they report a total value of assets under management with a value of 0 at the AIFM level (question 33 of the reporting template for AIFM-specific information) or at the AIF level (question 48 of the reporting template for AIF-specific information)?

Answer 79: AIFMs should use the assumption boxes of the reporting template to explain why the total value of assets under management equals 0. For example, this may be because the

assets of the AIF have been liquidated, merged with or transferred to another AIF or because the management of the AIF has been transferred to another AIFM.

Question 80 [last update May 2017]: How should AIFMs report information on the breakdown between retail and professional investors (questions 119 and 120 of the reporting template for AIF-specific information) when this information is not available?

Answer: When the information is not available, AIFMs should report '0' for questions 119 and 120 and use the assumption boxes to indicate that the information is not available.

Question 81 [last update July 2017]: In a situation where an AIF purchases a loan in the secondary market, how should the AIF measure its exposure in relation to that loan?

Answer: In this case the notional value of the loan may overestimate the risk exposure. Therefore, the AIF should report the valuation of the loan, as it is reported in the calculation of its NAV. For example, if an AIF purchases a distressed and unlevered loan for €10 cash (without the use of leverage) and the notional amount of that loan (i.e. the outstanding principal) was €100, the AIF should report the amount it actually spent to acquire the loan i.e. €10, which corresponds to the maximum potential loss on the loan transaction, not the AIF's exposure with respect to that loan which would be €100 (i.e., the notional amount of such loan). During the life of the loan, the AIF should then measure the exposure in relation to that loan using the same valuation rules as the ones used for the calculation of its NAV.

Question 82 [last update July 2017]: In which currency should the NAV of the AIF (question 53 of the consolidated reporting template) be reported?

Answer: AIFMs should report the NAV in the base currency of the AIF.

Question 83 [last update 4 December 2019]: How should AIFMs report results of liquidity stress tests for closed-ended unleveraged AIFs that they manage?

Answer 83 [last update 4 December 2019]: Article 16(1) exempts closed-ended unleveraged AIFs from implementing liquidity risk management systems and from "*conducting stress tests, under normal and exceptional liquidity conditions, which enable AIFMs to assess the liquidity risk of the AIFs and monitor the liquidity risk of the AIFs accordingly*" (liquidity stress tests).

However, AIFMs need to report results of liquidity stress tests for all their AIFs as part of their reporting to competent authorities as particularly required in accordance with Article 24(2) of the AIFMD, further specified by Article 110(2)(f) of Commission Delegated Regulation (EU) No 231/2013, and integrated in field 280 of the AIFMD reporting template (2013-1359_consolidated_aifmd_reporting_template).

For closed-ended unleveraged AIFs, given the mandatory character of the field, AIFMs should indicate the question is Not Applicable and at least report in this field the fact that the relevant fund is a closed-ended unleveraged AIF.

However, where an AIFM decides to conduct liquidity stress tests for unleveraged closed-ended AIFs, it should report the results of the liquidity stress tests in the same field.

Question 84 [last update 28 May 2021] [QA 1021]: Which risk is measured by NET DV01? How shall it be reported?

Answer 84 [last update 28 May 2021]: Net DV01 should be the value change in price (value) of a portfolio and measures the portfolio's sensitivity to a change in the yield curve. Assume an increase of 1bp in the risk-free rate curve (assume a parallel shift) at the end of the reporting period. The effect on the total net asset value of the AIF (taking into account all the positions (including derivative positions) of the portfolio) shall be reported as a monetary value in base currency for each maturity bucket (< 5 years, 5-15 years and >15 years) as specified in data fields 140-142. Report: (i) a negative value if the variation of the net asset value is negative; (ii) a positive value if the variation is positive and (iii) a zero if the AIF is neutral or not exposed at all to this risk. In case a measure of risk is not applicable for an AIF or when AIFM report a zero value, the reasons should be explained in the „Risk Measure Description“ (data field 147). As indicated in the Guidelines, DV01 is defined as in ISDA definition.

For example, assume an AIF with NAV of 100M EUR encountering the following portfolio decline after a general increase of 1bp in the risk-free yield curve: 0.01%, decline for maturity bucket <5 years, 0.02% decline for maturity bucket 5-15 years and 0.03% decline for maturity bucket >15 years. Then for these maturity buckets it should report, in base currency, respectively: “-10000”, “-20000” and “-30000”.

Question 85 [last update 28 May 2021] [QA 1022]: Which risk is measured by NET CS01? How shall it be reported?

Answer 85 [last update 28 May 2021]: Net CS01 measures the portfolio's sensitivity to a change in credit spreads. Assume a general increase in all credit spreads of 1bp at the end of the reporting period. The effect on the total net asset value of the AIF (taking into account all the positions (including derivative positions) of the portfolio) should be reported as a monetary value in base currency for each maturity bucket (< 5 years, 5-15 years and >15 years) as specified in data fields 140-142. Report: (i) a negative value if the variation of the net asset value is negative; (ii) a positive value if the variation is positive and (iii) a zero if the AIF is neutral or not exposed at all to this risk. In case a measure of risk is not applicable for an AIF or when AIFM report a zero value, the reasons should be explained in the “Risk Measure Description” (data field 147). As indicated in the Guidelines, CS01 is defined as in ISDA definition.

For example, assume an AIF with NAV of 100M EUR encountering the following portfolio decline after a general increase of 1bp in all credit spreads: 0.01%, decline for maturity bucket <5 years, 0.02% decline for maturity bucket 5-15 years and 0.03% decline for maturity bucket >15 years. Then for these maturity buckets it should report, in base currency, respectively: “-10000”, “-20000” and “-30000”.

Question 86 [last update 28 May 2021] [QA 1023]: Which risk is measured by Net Equity Delta? How shall it be reported?

Answer 86 [last update 28 May 2021]: Net equity delta is used to analyse portfolio's sensitivity to movements in equity prices. Assume all equity prices the AIF is exposed to decline by 1% at the end of the reporting period. Report the effect on the total net asset value of the AIF (taking into account all the positions (including derivative positions) of the portfolio) as a monetary value in base currency. In the case of derivative positions, a decline of 1% in the value of the underlying should be considered, and not in the value of the derivative. Hence, it shall report: (i) a negative value if the variation of the net asset value is negative; (ii) a positive value if the variation is positive and (iii) a zero if the AIF is neutral or not exposed at all to this risk. In case a measure of risk is not applicable for an AIF or when AIFM report a zero value, the reasons should be explained in the "Risk Measure Description" (data field 147).

Example:

- i. Assume at the quarter-end that the NAV sensitivity of an AIF to a 1% equity price decline is -0.5% and that its NAV is 100M EUR, then the figure to be reported under the field "net equity delta" would be "-500000".
- ii. Assume the AIF is fully exposed to fixed-income instruments, then a zero would be reported under the field "net equity delta" and "Not applicable given AIF's predominant type" would be reported in the Risk Measure Description field (147).

Section IV: Notification of AIFMs

Date last updated: 13 June 2023

Question 1 [last update 27 June 2014]: May an AIFM manage an AIF in a host MS under Article 33 of the AIFMD without having identified any existing AIF in that host MS beforehand?

Answer 1 [last update 27 June 2014]: Yes. The fact that an AIFM cannot identify a pre-existing AIF in the host MS does not prevent an AIFM from managing an AIF in that host MS under Article 33 of the AIFMD. In practice, the creation of the first AIF in the host MS is usually conditional on the AIFM having previously notified the host MS's national competent authority under Article 33 of the AIFMD. Therefore, it may be necessary for an AIFM to first notify its wish to make use of the management passport under Article 33 in order to subsequently be in a position to create and manage AIFs in that host MS.

Question 2 [last update 27 June 2014]: When an AIFM wishes to manage an AIF in a host MS for the first time, but has not yet set up any AIF in that host MS, how should it comply with the requirement of Article 33(2)(b) of the AIFMD to identify the AIFs it intends to manage?

Answer 2 [last update 27 June 2014]: If the AIFM has no prior presence in the host MS it is sufficient for the AIFM to specify the types of strategy of the AIFs it intends to manage in the host MS. However, this is without prejudice to the obligation for the AIFM to communicate a programme of operations stating the services it intends to perform in the host MS.

Question 3 [last update 26 March 2015]: Should an AIFM that is already managing AIFs in a host Member State under Article 33 of the AIFMD and that wishes to manage a new AIF in that host Member State undertake a new notification under Article 33(2) of the AIFMD?

Answer 3: The AIFM should not undertake a new notification under Article 33(2) of the AIFMD every time it wishes to manage a new AIF established in a given Member State. The original Article 33(2) notification should be considered valid for all the AIFs it intends to manage in that given Member State. In such cases, an update in accordance with Article 33(6) should be sent to identify each new AIF to be managed under the original Article 33(2) notification. When the proposed new AIFs are of a different type from the ones specified in the original Article 33(2) notification, the AIFM should clarify this in the update submitted under Article 33(6).

Question 4 [last update June 2017]: An AIFM wants to manage AIFs domiciled in another Member State by way of the AIF management passport (Article 33 of AIFMD). In the programme of operations, how does the AIFM have to provide information on the AIFs it intends to manage?

Answer: Where specific AIFs cannot be identified at the time of the notification, the AIFs to be managed may be identified by their investment strategy. In that regard, ESMA sees merit in relying on the investment strategies contained in the reporting template for identification purposes (Annex IV of Commission Delegated Regulation (EU) No 231/2013). Where an AIFM

has only been authorised to manage certain types of AIFs, it could also refer to the scope of its authorisation to identify the funds to be managed.

Where the AIFM is able to identify specific AIFs, these should be identified in the programme of operations by their name and national identifier (if available). Information on those funds should also include their investment strategies.

In accordance with Article 33(6) of AIFMD, all changes to the programme of operations have to be notified by the AIFM to the competent authorities in its home Member State. This includes changes to the programme of operations in cases where the AIFM intends to manage further AIFs (if specified by name) or types of AIFs (if specified by investment strategy) not previously listed in that document.

Question 5 [last update 4 October 2018]: An AIFM intends to manage an EU umbrella AIF on a cross-border basis by way of the AIF management passport (Article 33 of AIFMD). Does the AIFM have to identify all the compartments of the umbrella AIF in the notification?

Answer 5 [last update 4 October 2018]: Yes. In the notification, the AIFM has to identify the umbrella AIF, as well as the name and investment strategy of its compartments, to facilitate administrative procedure in home and host Member States.

Any change in the composition of an umbrella AIF that is managed on a cross-border basis has to be notified to the competent authorities pursuant to Article 33(6) of AIFMD.

Question 6 [last update 13 June 2023] [QA 1072]: When an AIFM intends to provide the activities and services for which it has been authorised in a host Member State, either directly or through a branch, may that AIFM passport in that host Member State only the other functions that an AIFM may additionally perform in the course of the collective management of an AIF, which are referred to in point (2) of Annex I to the AIFMD, without also passporting investment management functions?

Answer: Answer provided by the European Commission in accordance with Article 16b(5) of the ESMA Regulation¹⁹

No. The AIFMD passporting regime is linked to the management of an EU AIF. Annex I lists the investment management functions which an AIFM shall at least perform when managing an AIF (point 1) and the other functions that an AIFM may additionally perform in the course of the collective management of an AIF (point 2). The activities referred to in Annex I, point 2 are therefore ancillary to the activities referred to in Annex I, point 1 and cannot be exercised independently from those. That is also the case when AIFM passport their services in

¹⁹ The answers provided by the European Commission clarify provisions already contained in the applicable legislation. They do not extend in any way the rights and obligations deriving from such legislation nor do they introduce any additional requirements for the concerned operators and competent authorities. The answers are merely intended to assist natural or legal persons, including competent authorities and Union institutions and bodies in clarifying the application or implementation of the relevant legal provisions. Only the Court of Justice of the European Union is competent to authoritatively interpret Union law. The views expressed in the internal Commission Decision cannot prejudice the position that the European Commission might take before the Union and national courts.

another Member State. Furthermore, pursuant to Article 33(2), point (b), AIFMD, an AIFM intending to manage EU AIFs established in another Member State is to communicate to the competent authorities of its home Member State a program of operations referring to the services it intends to provide and the EU AIF it intends to manage. That requirement cannot be interpreted otherwise than referring to investment management foremost whereas auxiliary services remain as such auxiliary and are to be performed only in addition to the management of an EU AIF.

Section V: MiFID services under Article 6(4) of the AIFMD

Date last updated: 27 June 2014

Question 1 [last update 27 June 2014]: Can competent authorities in a Member State other than the home Member State of an AIFM accept passport notifications for the activities of the AIFM authorised under Article 6(4) of the AIFMD?

Answer 1: Yes. Article 92 of Directive 2014/65/EU (MiFID 2) modifies the provisions of the AIFMD in order to establish that an AIFM authorised to provide the MiFID investment services mentioned under Article 6(4) of the AIFMD has the right to provide these services on a cross-border basis under the authorisation granted by the competent authorities of its home Member State.

Member States must apply the measures referred to in Article 92 of MiFID 2 from 3 July 2015. However, the principle of sincere cooperation set out in Article 4(3) TFEU requires the Member States to facilitate the achievement of the Union's tasks and refrain from any measure which could jeopardise the attainment of the Union's objectives. It is therefore recommended that competent authorities accept passport notifications for the activities of the AIFM authorised under Article 6(4) of the AIFMD even before 3 July 2015.

Section VI: Depositaries

Date last updated: 20 July 2022

Question 1 [last update 21 July 2014]: Do the cash monitoring duties apply on a look-through basis to cash accounts which are not opened in the name of the AIF/AIFM, but in the name of financial and/ or legal structures established by the AIF or by the AIFM acting on behalf of the AIF for the purposes of investing in the underlying assets and which are controlled directly or indirectly by the AIF or by the AIFM acting on behalf of the AIF?

Answer 1: No, the cash monitoring requirements under Articles 85 and 86 of Commission Regulation (EU) No 231/2013 (the AIFMD Level 2 Regulation) do not apply to cash accounts opened in the name of companies in which the AIF/AIFM holds investments.

Question 2 [last update 21 July 2014]: Is it possible for the depositary to delegate to a third party (e.g. an administrator which is not an affiliate of the depositary) the cash flow reconciliation duties?

Answer 2: No. According to the provisions of Article 21(11) of the AIFMD, the monitoring of the cash flow is an activity which cannot be delegated. For example, the depositary should not rely exclusively on the reconciliation processes performed by a third party, even where the depositary performs due diligence on those processes.

In line with the provisions of recital 42 of the AIFMD, the only delegation which is permitted in relation to the monitoring of the cash flow is that of the depositary's supporting tasks, such as administrative or technical functions performed by the depositary as a part of its depositary tasks.

Question 3 [last update 21 July 2014]: How far down the distribution chain is the depositary to reconcile subscription flows?

Answer 3: The cash monitoring duties relate to any of the cash accounts – including accounts used for subscriptions and redemptions – referred to in Article 21(7) of the AIFMD (as implemented by Articles 85 to 87 of the AIFMD Level 2 Regulation): accounts opened in the name of the AIF, in the name of the AIFM acting on behalf of the AIF or in the name of the depositary acting on behalf of the AIF. The rules on reconciliations linked to subscriptions are further detailed in Article 93 of the AIFMD Level 2 Regulation.

Question 4 [last update 21 July 2014]: Does the obligation to verify that the AIF and AIFM comply with applicable laws and regulations in Article 95 (a) of the AIFMD Level 2 Regulation cover anti-money laundering rules, labour law and contracts of the AIF/AIFM with third parties which do not relate to the asset or risk management activities?

Answer 4: In general, the obligation to set up and implement appropriate procedures for the verifications required under Article 95(a) of the AIFMD Level 2 Regulation should be linked to the requirement in Article 21(9) of the AIFMD for the depositary to ensure oversight of the AIF's

operations. The verifications required under Article 95(a) of the AIFMD Level 2 Regulation are meant to ensure that the AIF and/or the AIFM acting on behalf of the AIF comply with the applicable laws and regulations applying to the AIF including fund rules, instruments of incorporation (e.g. investment restrictions, leverage limits, etc.). They do not relate to the laws and regulations applying to these entities that do not have any direct relation with the instructions of the AIFM to the depositary (e.g. the application of the remuneration rules by the AIFM). This is without prejudice to the depositary voluntarily (or in agreement with the AIF/AIFM) performing more extensive verifications.

Therefore, the obligation to verify that the AIF and AIFM comply with applicable laws and regulations does not cover labour law or contracts with third parties unrelated to asset or risk management activities.

As for the compliance with the relevant anti-money laundering rules, the contract by which the depositary is appointed shall include information on the tasks and responsibilities of the parties to the contract in respect of obligations relating to the prevention of money laundering and the financing of terrorism (Article 83(1)(m)) of the AIFMD Level 2 Regulation. This is without prejudice to the relevant anti-money laundering obligations applying to the depositary, AIF and AIFM under the EU legislation on the prevention of the use of the financial system for the purpose of money laundering and terrorist financing.

Question 5 [last update 21 July 2014]: Is it correct to say that where derivative contracts contain a netting clause, derivatives should fall exclusively under the cash flow monitoring obligation of the depositary and that it is only in the absence of a netting clause – where the AIF/AIFM gets an ownership claim for the underlying – that the depositary is in a position to verify whether the AIF/AIFM has acquired ownership of the underlying asset according to Article 90(2)(c) of Commission Regulation (EU) No 231/2013?

Answer 5: No. Recital 103 of the AIFMD Level 2 Regulation gives examples of assets that are not financial instruments to be held in custody and specifically includes *'financial contracts such as derivatives'* among these examples. Therefore, these assets are subject to the obligation to verify the ownership and maintain a record according to the provisions of Article 90(2)(c) of the AIFMD Level 2 Regulation. This duty involves, inter alia, looking at the contract to assess what the AIF/AIFM is entitled to.

Question 6 [last update 21 July 2014]: Are holdings in collective investment undertakings to be held in custody or subject to record keeping?

Answer 6: Unless, in accordance with applicable national law, they are only directly registered with the issuer itself or its agent, in the name of the AIF or the AIFM acting on behalf of the AIF (in which case the provisions of Article 88(2) of the AIFMD Level 2 Regulation apply), units of collective investment undertakings (CIUs) should be held in custody and subject to the relevant provisions of the AIFMD.

Question 7 [last update 21 July 2014]: Within the cash monitoring duties of a depositary, what is the meaning of “close of business day”?

Answer 7: Given that the requirements relating to the monitoring of the AIF's cash flows apply to the depositary (Article 86 of the AIFMD Level 2 Regulation), the "close of business day" should be determined in relation to the jurisdiction where the depositary is established which, for EU AIFs, is also the home Member State of the AIF. This means that the identification of significant cash flows referred to under Article 86(c) of the AIFMD Level 2 Regulation should be made with reference to the close of business day in the jurisdiction where the depositary is established, but the relevant checks may be carried out after the close of business in the depositary's jurisdiction, typically the following business day.

Question 8 [last update 1 October 2015]: When assets of an AIF held in custody by the depositary of the AIF are provided by that depositary to a CSD or a third country CSD as defined under Regulation (EU) No 909/2014 (CSDR) in order to be held in custody in accordance with Article 21(8) of the AIFMD, does the CSD or third country CSD have to comply with the provisions on delegation set out under Article 21(11) of the AIFMD?

Answer 8: Yes.

Question 9 [last update 16 December 2015]: Does the depositary's liability regime apply to those assets for which a depositary has safe-keeping duties on a look-through basis according to Articles 89(3), first sub-paragraph, and 90(5), first sub-paragraph of the AIFMD Level 2 Regulation?

Answer 9: Yes. The look-through requirements under Articles 89(3), first sub-paragraph, and 90(5), first sub-paragraph of the AIFMD Level 2 Regulation mean that the depositary has safe-keeping duties in relation to the relevant assets. The safe-keeping duties are described under Article 21(8) of the AIFMD and the depositary's liability regime set out under Article 21(12) of the AIFMD (and the relevant implementing provisions under the AIFMD Level 2 Regulation) apply to safekeeping activities. This means that for financial instruments held in custody to which the look-through requirements under Article 89(3), first sub-paragraph of the AIFMD Level 2 Regulation apply, the depositary is subject to the strict liability regime under Article 21(12), second sub-paragraph of the AIFMD. For other assets to which the look-through requirements under Article 90(5), first sub-paragraph of the AIFMD Level 2 Regulation apply, the depositary is subject to the liability regime under Article 21(12), third sub-paragraph of the AIFMD.

According to Articles 89(3), second sub-paragraph, and 90(5), second sub-paragraph of the AIFMD Level 2 Regulation, the look-through provision does not apply to funds of funds or master-feeder structures provided they have a depositary which safe-keeps the fund's assets appropriately. Therefore, it is only for this type of investment that the liability regime should not apply to the depositary of the AIF as a consequence of the fact that the depositary is not subject to any safe-keeping duties in relation to those investments.

Question 10 [last update 4 June 2019]: The AIFMD sets out strict restrictions under which depositaries are allowed to delegate the safekeeping of assets of the AIF, whereas the delegation of depositary functions pursuant to Article 21(7) and (9) of the AIFMD (i.e. monitoring of the cash flow and oversight functions) is not permitted. Recital 42 of the AIFMD states that “delegation of supporting tasks that are linked to its depositary tasks, such as administrative or technical functions performed by the depositary as a part of its depositary tasks, is not subject to the specific limitations and requirements set out in the AIFMD”. What are ‘supporting tasks that are linked to depositary tasks such as administrative or technical functions performed as part of the depositary tasks’ and under which conditions would it be possible to entrust third parties with such tasks?

Answer 10 [last update 4 June 2019]: The answer refers to supporting tasks linked to the depositary tasks, such as administrative or technical functions performed as part of the depositary tasks, only. Supporting tasks that are linked to depositary tasks such as administrative or technical functions performed as part of the depositary tasks listed under Article 21(7) and (9) of the AIFMD could be entrusted to third parties where all of the following conditions are met:

- iii. the execution of the tasks does not involve any discretionary judgement or interpretation by the third party in relation to the depositary functions;
- iv. the execution of the tasks does not require specific expertise in regard to the depositary function; and
- v. the tasks are standardised and pre-defined.

Question 11 [last update 4 June 2019]: May depositaries entrust third parties with the performance of tasks that would give them the ability to transfer assets belonging to AIFs?

Answer 11 [last update 4 June 2019]: Yes, where depositaries entrust tasks to third parties and give them the ability to transfer assets belonging to AIFs without requiring the intervention of the depositary, these arrangements are subject to the delegation requirements set out in Article 21(11) AIFMD.

Question 12 [last update 4 June 2019]: Where the depositary of an AIF is a branch and the head office is established in a Member State other than the home Member State of the AIF, to which extent may the branch allocate its depositary functions (e.g. custody) to its head office in compliance with the establishment requirement set out in Article 21(5) of AIFMD?

Answer 12 [last update 4 June 2019]: The internal allocation of functions between the head office and the branches of a depositary shall not lead to situations that may represent a circumvention of the establishment requirement under Article 21(5) of the AIFMD. Therefore, the operational infrastructure and internal governance system of such branches must be adequate to carry out depositary functions autonomously from its head office and ensure compliance with national rules implementing the AIFMD.

Question 13 [last update 4 June 2019]: Where depositary functions are performed by a branch established in the home Member State of the AIF other than the home Member State of the depositary's head office, who is responsible for supervising the activities of the branch relating to depositary functions? Is it the competent authority of the Member State where the depositary's head office is established or the competent authority of the Member State where the branch is established?

Answer 13 [last update 4 June 2019]: The AIFMD, the CRD and the MiFID II do not grant any passport for depositary activities in relation to AIFs. Hence, branches located in the home Member State of the AIFs other than the home Member State of the depositary's head office may also be subject to local authorisation in order to perform depositary activities in relation to AIFs. Therefore, the competent authority of the Member State where the branch is established should be responsible for supervising the activities of the branch with regard to depositary functions in relation to AIFs. This includes the supervision of the allocation of depositary functions from the branch to its head office or vice versa to avoid any possible circumvention of the establishment requirement under Article 21(5) of the AIFMD.

Question 14 [last update 4 June 2019]: Where a depositary delegates some of its functions to another legal entity which belongs to the same group, should this be considered a delegation for the purposes of the application of the depositary delegation rules under Article 21(11) of the AIFMD?

Answer 14 [last update 4 June 2019]: Yes. Legal entities within the same group of a depositary should be considered 'third parties' for the purpose of the depositary delegation rules under Article 21(11) of the AIFMD.

Question 15 [last update 20 July 2022] [QA 1024]: According to Article 89(1)(c) of Commission Delegated Regulation (EU) No 231/2013 as modified by Commission Delegated Regulation (EU) 2018/1618 and Article 13(1)(c) of Commission Delegated Regulation (EU) 2016/438 as modified by Commission Delegated Regulation (EU) 2018/1619 reconciliations are conducted as frequently as necessary between the depositary's internal accounts and records and those of any third party to whom safekeeping has been delegated. What does this mean for an AIF or UCITS with a weekly dealing frequency which trades on a daily basis?

Answer 15: Answer provided by the European Commission in accordance with Article 16b(5) of the ESMA Regulation²⁰

²⁰ The answers provided by the European Commission clarify provisions already contained in the applicable legislation. They do not extend in any way the rights and obligations deriving from such legislation nor do they introduce any additional requirements for the concerned operators and competent authorities. The answers are merely intended to assist natural or legal persons, including competent authorities and Union institutions and bodies in clarifying the application or implementation of the relevant legal provisions. Only the Court of Justice of the European Union is competent to authoritatively interpret Union law. The views expressed in the internal Commission Decision cannot prejudice the position that the European Commission might take before the Union and national courts.

The reconciliation frequency depends not only on the dealing frequency of the relevant AIF or UCITS, but also on any trade which occurs even outside the dealing frequency. Therefore, if an AIF or UCITS with a weekly dealing frequency trades on a daily basis, daily reconciliations are required.

Question 16 [last update 20 July 2022] [QA 1025]: According to Article 89(1)(c) of Commission Delegated Regulation (EU) No 231/2013 as modified by Commission Delegated Regulation (EU) 2018/1618 and Article 13(1)(c) of Commission Delegated Regulation (EU) 2016/438 as modified by Commission Delegated Regulation (EU) 2018/1619 reconciliations are conducted as frequently as necessary between the depositary's internal accounts and records and those of any third party to whom safekeeping has been delegated. What does this mean in case of use of a tri-party collateral manager, which is not the depositary?

Answer 16: Answer provided by the European Commission in accordance with Article 16b(5) of the ESMA Regulation²¹

In this case the tri-party collateral manager is appointed by the asset manager in accordance with Article 20 of Directive 2011/61/EU or in accordance with Article 13 of Directive 2009/65/EC; it also needs to be the delegate of the depositary in accordance with Article 21(11) of Directive 2011/61/EU or in accordance with Article 22a(2) of Directive 2009/65/EC. The tri-party collateral manager is required to transmit the end-of-day positions on a fund-by-fund basis or, if applicable, on a compartment-by-compartment basis. The information provided allows the depositary to record the end-of-day positions and allows it to comply with the provisions (a) of Article 98(2a)(a) (as inserted by Delegated Regulation (EU) 2018/1618) and in particular point (ii) thereof, and (b) with the provisions under Article 15(2a)(a) (as inserted by Delegated Regulation (EU) 2018/1619), and in particular point (ii) thereof. Thus, the information provided allows the depositary (for both Regulations) to verify that the quantity of the identified financial instruments recorded in the financial instruments accounts opened in its books matches the quantity of the identified financial instruments held in custody by the third party.

²¹ The answers provided by the European Commission clarify provisions already contained in the applicable legislation. They do not extend in any way the rights and obligations deriving from such legislation nor do they introduce any additional requirements for the concerned operators and competent authorities. The answers are merely intended to assist natural or legal persons, including competent authorities and Union institutions and bodies in clarifying the application or implementation of the relevant legal provisions. Only the Court of Justice of the European Union is competent to authoritatively interpret Union law. The views expressed in the internal Commission Decision cannot prejudice the position that the European Commission might take before the Union and national courts.

Section VII: Calculation of leverage

Date last updated: 13 June 2023

Question 1 [last update 21 July 2014]: An AIF that is a private equity fund as referred to in recital 78 of the AIFMD, controls a financial structure that is used to acquire non-listed companies or issuers. The financial structure raises debt to finance the acquisition of those assets. When calculating the exposure of the AIF, shall the AIFM include the debt raised at the level of the financial structure?

Answer 1: According to Article 6(3) of Regulation 231/2013, exposure contained in any financial or legal structures controlled by an AIF shall be included in the calculation of the exposure where those structures are specifically set up to directly or indirectly increase the exposure at the level of the AIF. Therefore, debt raised by such a financial structure to finance the acquisition of assets shall be included in the calculation of the exposure where those structures are: (1) specifically set up to directly or indirectly increase the exposure at the level of the AIF and (2) the AIF controls such a structure. If these two conditions are fulfilled, the debt raised by the financial structure is to be included in the calculation of the exposure of the AIF.

Where the AIF does not have to bear losses beyond its investment in a financial structure that is used to acquire non-listed companies or issuers, the financial structure should not be considered as having been set up to directly or indirectly increase the exposure at the level of the AIF. In any case, these structures should not be used as a means to circumvent the provisions of the AIFMD on leverage.

Question 2 [last update 21 July 2014]: An AIF controls a financial structure that is used to acquire non-listed companies or issuers. When calculating the exposure of the AIF, shall the AIFM include the debt raised at the level of the non-listed companies or issuers?

Answer 2: No, provided that the AIF does not have to bear potential losses beyond its investment in the non-listed companies or issuers.

However, if the debt at the level of the non-listed companies or issuers exposes the AIF to potential losses beyond its investment in those non-listed companies or issuers, the debt shall be included in the calculation of the exposure of the AIF.

Question 3 [last update 21 July 2014]: An AIF controls a financial structure that acquires non-listed companies or issuers by raising debt. At the time of the acquisition, the non-listed companies or issuers were not leveraged. Subsequently, the non-listed companies or issuers raise debt to finance a dividend distribution enabling the financial structure to reimburse entirely its acquisition debt. When calculating the exposure of the AIF, shall the AIFM include the debt raised at the level of the non-listed companies or issuers?

Answer 3: No, provided that the AIF does not have to bear potential losses beyond its investment in the non-listed companies or issuers.

Question 4 [last update 26 March 2015]: When calculating the exposure of an AIF in accordance with the gross method under Article 7(a) of the implementing Regulation, should AIFMs exclude the value of all cash held in the base currency of the AIF?

Answer 4: Yes. The exclusion of cash held in the base currency of the AIF applies to cash and also to cash equivalents that meet the requirements of Article 7(a) of the implementing Regulation.

Question 5 [last update 12 May 2015]: Which positions should AIFMs take into account when calculating their exposure under the commitment approach pursuant to Article 8 of the Implementing Regulation?

Answer: AIFMs should take into account the absolute value of all the positions of their AIFs valued in accordance with Article 19 of the AIFMD and the criteria laid down in paragraphs 2 to 9 of Article 8 of the Implementing Regulation. For derivative instruments, as required under Article 8(2)(a), AIFMs should convert each position into an equivalent position in the underlying assets using the methodologies set out in Article 10 (which refers to Annex II of the implementing Regulation) and points (4) to (9) and (14) in Annex I of the implementing Regulation.

Question 6 [last update 29 March 2019]: Should the calculation of leverage exposure of an AIF resulting from a short-term interest rate future be adjusted for the duration of the future, under the gross and the commitment methods?

Answer 6 [last update 29 March 2019]: No. The calculation of leverage exposure of an AIF resulting from a short-term interest rate future should not be adjusted for the duration of the future. Subparagraph (a) of paragraph (1) of Annex II of the Commission Delegated Regulation (EU) No 231/2013 sets out the method to be applied, when converting all interest rate futures into equivalent positions in the underlying asset in the process of calculation of exposure of the AIF, as the product of the number of contracts and the notional contract size. The duration of the financial instrument should not be considered for the purpose of that calculation.

This does not, however, preclude AIFMs managing AIFs that, in accordance with their core investment policy, primarily invest in interest rate derivatives from applying duration netting rules under the commitment method, in accordance with paragraph (9) of Article 8 of the Commission Delegated Regulation (EU) No 231/2013.

Question 7 [last update 29 March 2019]: How frequently should an AIFM calculate the leverage of each AIF that it manages?

Answer 7 [last update 29 March 2019]: An AIFM should calculate the leverage of each AIF that it manages as often as is required to ensure that the AIF is capable of remaining in compliance with leverage limits at all times. Consequently, leverage should be calculated at least as often as the NAV is calculated, or more frequently if required. Circumstances which may lead to increased frequency of leverage calculation include material market movements, changes to portfolio composition and any other factors the AIFM believes require calculation

of leverage more frequently than NAV in order for the AIF to remain in compliance with leverage limits at all times.

Question 8 [last update 13 June 2023] [QA 1073]: When calculating the leverage of an AIF whose core investment policy is to invest in real estate directly or indirectly, shall the AIFM include the exposure contained in financial or legal structures involving third parties controlled by that AIF as referred to in Article 6(1) and (3) of Delegated Regulation (EU) 231/2013?

Answer: *Answer provided by the European Commission in accordance with Article 16b(5) of the ESMA Regulation*²²

Yes. Under Article 6(3) of Delegated Regulation (EU) 231/2013, an AIFM must include the exposure contained in financial or legal structures involving third parties controlled by the AIF when calculating the leverage of such AIF, where these structures are specifically set up to directly or indirectly increase the exposure at the level of the AIF. For instance, financial or legal structures involving third parties (eg. special purpose vehicles controlled by the AIF), put in place to acquire real estate assets, which obtain leverage for that purpose, directly or indirectly create leverage at the level of the AIF investing in real estate.

The exemption referred to in the second sentence of Article 6(3) of Delegated Regulation (EU) 231/2013 for AIFs whose core investment policy is to acquire control of non-listed companies or issuers, applies solely to non-listed companies (mostly venture capital and private equity funds), provided that the AIF or the AIFM acting on behalf of the AIF does not have to bear potential losses beyond its investment in the respective company or issuer. Therefore, that exemption should not apply to AIFs, which acquire real estate assets indirectly through non-listed companies, as such non-listed companies are being utilised by the AIF with the purpose of implementing the AIF's investment policy, which is the acquisition of real estate assets.

²² The answers provided by the European Commission clarify provisions already contained in the applicable legislation. They do not extend in any way the rights and obligations deriving from such legislation nor do they introduce any additional requirements for the concerned operators and competent authorities. The answers are merely intended to assist natural or legal persons, including competent authorities and Union institutions and bodies in clarifying the application or implementation of the relevant legal provisions. Only the Court of Justice of the European Union is competent to authoritatively interpret Union law. The views expressed in the internal Commission Decision cannot prejudice the position that the European Commission might take before the Union and national courts.

Section VIII: Delegation

Date last updated: 20 July 2022

Question 1 [last update 30 September 2014]: An AIFM manages multiple AIFs. When assessing whether any delegation of portfolio management and/or risk management by the AIFM results in the AIFM becoming a letter-box entity as referred to in Article 20 of the AIFMD, should the assessment be made at the level of the AIFM or at the level of each AIF?

Answer 1: The provisions on letter-box entities in Article 82 of the implementing Regulation apply in relation to the management of a particular AIF and not in relation to a group of AIFs. The assessment should therefore be carried out at the level of each individual AIF.

Question 2 [last update 16 November 2016]: Where the AIFM does not itself perform the functions set out in Annex I of the AIFMD, does this release the AIFM from its responsibility to ensure compliance of the relevant function(s) with the AIFMD?

Answer 2: No. Where a third party performs a function stated in Annex I of the AIFMD, this function should be considered as having been delegated by the AIFM to the third party. Therefore, the AIFM should be responsible for ensuring compliance with the requirements on delegation set out in Article 20 of the AIFMD and the principle expressed in Article 5(1) of the Directive according to which the single AIFM appointed for an AIF is responsible for ensuring compliance with the AIFMD. For the avoidance of doubt, this applies to all functions stated in point 1 and point 2 of Annex I of the AIFMD.

Question 3 [last update 16 November 2016]: Can an externally-managed AIF itself perform the investment management functions set out in point 1 of Annex I or functions set out in point 2 of Annex I of the AIFMD or would it be possible that the external AIFM delegates the performance of these functions to the governing body or any other internal resource of the externally-managed AIF?

Answer 3: No. Externally-managed AIFs are not regulated as AIFM. The performance of the functions stated in Annex I of the AIFMD is only permitted for AIFs which are internally-managed pursuant to Article 5(1)(b) of the AIFMD. Where the AIF appoints an external AIFM pursuant to Article 5(1)(a), the external AIFM is through its appointment as AIFM of the AIF responsible for providing the functions stated in Annex I of the AIFMD. The external AIFM may delegate to third parties the task of carrying out functions on its behalf in accordance with Article 20 of the AIFMD. The AIF is, however, not a 'third party' in accordance with Article 20(1) of the AIFMD.

Question 4 [last update 20 July 2022] [QA 1026]: When the marketing of an AIF or a UCITS is not performed by the AIFM or UCITS management company but by a third party distributor, does the responsibility for ensuring that marketing communications comply with the requirements set out in Article 4(1) of Regulation (EU) 2019/1156 lie with the AIFM or the UCITS management company where there is a contractual relationship between the AIFM or the UCITS management company and the third party distributor? Conversely, does the

responsibility for ensuring that marketing communications comply with the requirements set out in Article 4(1) of Regulation (EU) 2019/1156 still lie with the AIFM or the UCITS management company in case there is no contractual relationship with the third party distributor?

Answer 4: Answer provided by the European Commission in accordance with Article 16b(5) of the ESMA Regulation²³

Marketing is one of the functions included in the management of funds, and therefore subject to the provisions on delegation (Article 13 of Directive 2009/65/EC and Article 20 of Directive 2011/61/EU), which themselves govern the conditions for that delegation under the principle of full responsibility of fund managers.

Article 1 of Regulation (EU) 2019/1156 specifies that the aim of this Regulation is to establish uniform rules on the publication of national provisions concerning marketing requirements for collective investment undertakings and on marketing communications addressed to investors. These requirements are laid down in Article 4 of this Regulation, and are further clarified in ESMA Guidelines.

Fund managers are responsible for the compliance with Article 4 of Regulation (EU) 2019/1156, irrespective of who is the actual entity marketing the fund, and of the relationship it has with the third party distributor (whether it is contractual or not).

²³ The answers provided by the European Commission clarify provisions already contained in the applicable legislation. They do not extend in any way the rights and obligations deriving from such legislation nor do they introduce any additional requirements for the concerned operators and competent authorities. The answers are merely intended to assist natural or legal persons, including competent authorities and Union institutions and bodies in clarifying the application or implementation of the relevant legal provisions. Only the Court of Justice of the European Union is competent to authoritatively interpret Union law. The views expressed in the internal Commission Decision cannot prejudice the position that the European Commission might take before the Union and national courts.

Section IX: Calculation of the total value of assets under management

Date last updated: 3 June 2016

Question 1 [last update 11 November 2014]: Should AIFMs include short derivative positions in the calculation of the total value of assets under management?

Answer 1: Yes. According to Article 2(3) of the implementing Regulation, AIFMs should convert derivative instrument positions (both long and short) into an equivalent position in the underlying assets and the absolute value of that equivalent position should then be used for the calculation of the total value of assets under management.

Question 2 [last update 21 July 2015]: Should AIFMs include short non-derivative positions for the calculation of the total value of assets under management?

Answer 2: Yes. According to Article 2(1)(b) of the implementing Regulation, AIFMs should include assets acquired through leverage. Where a short sale occurs with assets being received, AIFMs should include the assets received in the calculation of the total value of assets under management.

Question 3 [last update 3 June 2016]: Should “committed capital” be taken into account when calculating the total value of assets under management (AuM) pursuant to Article 3(2) of AIFMD and Article 2 of Commission Regulation (EU) No 231/2013?

Answer 3: Generally, no. As a general rule, committed capital does not contribute to the actual assets of the AIF for which it was pledged, as long as it has not been drawn down by the AIFM. However, Article 2 of Commission Regulation (EU) No 231/2013 makes reference to national valuation rules as well as to rules on valuation contained in the AIF rules or articles of incorporation. Committed capital should therefore be taken into account in the calculation of total AUM if national rules foresee this.

Section X: Additional own funds

Date last updated: 3 June 2016

Question 1: [last update 26 March 2015]: Should AIFMs exclude investments by AIFs in other AIFs they manage for the calculation of additional own funds under Article 9(3) of the AIFMD?

Answer 1: Yes.

Question 2: [last update 26 March 2015]: Should AIFMs exclude investments by AIFs in other AIFs they manage for the calculation of additional own funds to cover potential liability risks arising from professional negligence under Article 9(7) of the AIFMD?

Answer 2: No, because investments in other AIFs managed by the same AIFM increase the operational risk.

Question 3 [last update 3 June 2016]: Should “committed capital” be taken into account when calculating the additional own funds requirement pursuant to Articles 9(3) and 9(7) of AIFMD and Article 14(2) of Commission Regulation (EU) No 231/2013?

Answer 3: As a general rule, committed capital does not contribute to the actual assets of the AIF for which it was pledged, as long as it has not been drawn down by the AIFM.

Section XI: Scope

Date last updated: 16 December 2022

Question 1 [last update 26 March 2015]: According to Article 36(1) of the AIFMD, Member States may allow an authorised EU AIFM to market to professional investors, in their territory only, units or shares of EU feeder AIFs which have a non-EU master AIF managed by a non-EU AIFM provided that the EU AIFM managing the EU feeder AIF fulfils certain conditions as set out in Article 36(1) (a) to (c). Does the non-EU AIFM managing the non-EU master AIF also have to be authorised under the AIFMD?

Answer 1: According to Article 36(2) of the AIFMD, Member States may impose stricter rules on the AIFM in respect of the application of Article 36 of the AIFMD. Therefore, whether the non-EU AIFM managing the non-EU master AIFs has to be authorised under the AIFMD depends on the national law of the Member State transposing Article 36 of the AIFMD.

Question 2 [last update 17 December 2021] [QA 1027]: Are managers of undertakings investing in crypto-assets subject to the AIFMD?

Answer 2 [last update 17 December 2021]: It is important to assess on a case-by-case basis whether the relevant undertaking meets the definition of an ‘AIF’ as legally defined in Article 4(1)(a) of the AIFMD. In this context, market participants and NCAs should pay attention to the guidance provided in the ESMA Guidelines on key concepts of the AIFMD (ESMA/2013/611).

Collective investment undertakings raising capital from a number of investors to invest in crypto-assets in accordance with a defined investment policy for the benefit of those investors will qualify as ‘AIF’ in accordance with Article 4(1)(a) of the AIFMD. As the AIFMD does not provide for a list of eligible or non-eligible assets, AIFs may in principle invest in any traditional or alternative assets as long as the AIFM can ensure compliance with the AIFMD. However, more specific investment and risk diversification requirements for AIFs investing in crypto-assets as well as limitations regarding the target investors of such AIFs may exist at national level.

In this context, ESMA reminds market participants and investors of the high risks involved in investments in crypto-assets as previously stated in the joint ESMA, EBA and EIOPA warning from February 2018 (ESMA50-164-1284).²⁴ Market participants and investors should therefore be alert to the high risks of buying and/or holding these assets, including the possibility of losing all their money.

Question 3 [last update 16 December 2022] [QA 1028]: Are managers of special purpose acquisition companies (“SPACs”) subject to the AIFMD?

²⁴ https://www.esma.europa.eu/sites/default/files/library/esma50-164-1284_joint_esas_warning_on_virtual_currenciesl.pdf

Answer 3 [last update 16 December 2022]: SPACs are not yet legally defined in Union law.

In its Public Statement (ESMA32-384-5209)²⁵ ESMA has described SPACs as shell companies that are admitted to trading on a trading venue with the intention to acquire a business. ESMA has also listed the three stages of the typical life-cycle of a SPAC: (i) the Initial Public Offering (“IPO”); (ii) the SPAC searches for a target company to acquire and (iii) the business combination with the target company, typically through a merger (“business combination”).

However, the structure of SPAC transactions is complex and there are significant variations between the general structuring of relevant vehicles and concrete modalities of their transactions.

In light of this, it is important to assess on a case-by-case basis:

- whether SPACs meet the definition of an “AIF” as legally defined in Article 4(1)(a) of the AIFMD, and
- whether SPACs qualify as a “holding company” in accordance with Article 4(1)(o) of the AIFMD.

This assessment should take into account the specific features and characteristics of the individual structure of the SPAC and it should be based on substance, not form, paying close attention to the guidance provided in the ESMA Guidelines on key concepts of the AIFMD (ESMA/2013/611).

ESMA also notes that during the life-cycle of a SPAC, there might be circumstances which may be relevant when assessing if a SPAC qualifies as AIF, as follows:

- a SPAC does not raise capital through the IPO with a view to investing it in accordance with a defined investment policy;
- all, or substantially all, the proceeds of the IPO are used for the business combination;
- following the business combination, the SPAC has a general commercial or industrial purpose as defined in the ESMA Guidelines on key concepts of the AIFMD.

The occurrence of some or all of these circumstances may indicate that a SPAC is not an AIF as it might not meet all the elements described in the ESMA Guidelines on key concepts of the AIFMD.

Section XII: Impact of Regulation (EU) 648/2012 (EMIR)²⁶ on AIFMD

Date last updated: 24 May 2017

Question 1 [last update 19 July 2016]: For OTC financial derivative transactions that are centrally cleared and subject to the reporting obligation of EMIR, can AIFMs rely on the valuation provided by the central counterparty (CCP)?

Answer: No. The AIFMD framework requires AIFMs to have in place a process for proper and independent verification of the value of the OTC financial derivative transactions, even if they are centrally cleared. The valuation provided by the CCP can only serve as a point of reference for the verification performed by the AIFM. Nevertheless, the AIFM should be able to justify any deviation from the valuation provided by the CCP.

Question 2 [last update May 2017]: Where an AIF is subject to the clearing obligation of Article 4(1) of EMIR, can it make use of the exemption for intragroup transactions (Article 4(2) of EMIR)?

Answer: ESMA is of the view that in the case of AIFs the exemption for intragroup transactions should be construed narrowly, and that in most cases it will not be possible for the exemption to be used. An AIF can only make use of the exemption for intragroup transactions if it has been established to form part of the same group (as defined in Article 2(16) of EMIR) as the counterparty to the OTC derivative contract and if it fulfils all the criteria for intragroup transactions set out in Article 3(2)(a)(i)-(iv), (b), or (d) of EMIR.

Article 3(2)(a)(iii) of EMIR requires both counterparties to be included in the same consolidation on a full basis. In addition, they have to be subject to appropriate centralised risk evaluation, measurement and control procedures, as well as fulfil other specific requirements set out in Article 3(2) of EMIR.

An exemption to the clearing obligation based on Article 4(2) of EMIR can only be granted after a thorough case-by-case assessment, which will have to take into account whether the AIF has been established to form part of the same group as the counterparty to the OTC derivative contract and whether the AIF fulfils all the criteria set out in Article 3(2)(a), (b), or (d) of EMIR.

Where an AIF is granted an intragroup exemption for the clearing obligation, it follows that the AIF will not be considered a distinct entity and will not be treated separately for other purposes under EMIR either, in particular for the purpose of the bilateral margining thresholds calculation. Therefore, the aggregate month-end average notional amount referred in Article 28(1) of Commission Delegated Regulation (EU) 2016/2251 shall be calculated at the group level (including the relevant AIF).

²⁶ Regulation (EU) No 648/2012 of the European Parliament and of the Council of 4 July 2012 on OTC derivatives, central counterparties and trade repositories ("European Markets Infrastructure Regulation")

Section XIII: Impact of Regulation (EU) 2015/2365 (SFTR)²⁷ on AIFMD

Date last updated: 5 October 2017

Question 1 [last update 6 October 2016]: Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012, requires UCITS management companies, UCITS investment companies, and AIFMs to provide information to investors on the use made of SFTs and total return swaps in the annual report of each UCITS/AIF under management, as well as in each half-yearly report for UCITS. As Article 13 applies from 13 January 2017, which report should be the first to include this disclosure?

Answer: The information should be included in the next annual or half-yearly report to be published after 13 January 2017 which may relate to a reporting period beginning before that date.

Question 2 [last update 5 October 2017]: Pursuant to Article 13 of SFTR, UCITS management companies, UCITS investment companies, and AIFMs (“UCITS/AIF managers”) shall inform investors on the use they make of SFTs and total return swaps in annual (UCITS and AIFs) and half-yearly (UCITS only) reports. The information on SFTs and total return swaps shall include the data provided for in Section A of the Annex to SFTR.

Should this data be reported as aggregate data (with respect to the whole of the reporting period) or based on a snapshot (taken at the end of the reporting period)?

Answer: The table below explains how each data item in Section A of the Annex to the SFTR should be reported. All data items should be reported as a snapshot, with the exception of the following:

- Data on reuse of collateral
 - o Cash collateral reinvestment returns to the collective investment undertaking.
- Data on return and cost for each type of SFTs and total return swaps
 - o broken down between the collective investment undertaking, the manager of the collective investment undertaking and third parties (e.g. agent lender) in absolute terms and as a percentage of overall returns generated by that type of SFTs and total return swaps

For each of the data items firms should not artificially alter their practices in a way that would lead to the reporting being misleading.

²⁷ Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012

The guidance provided by this Q&A is without prejudice to further work that ESMA intends to carry out in relation to the disclosure obligations for UCITS and AIFs under SFTR.

Heading	Sub-item	How to report
Global data	The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents	Snapshot
	The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).	Snapshot
Concentration data	Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name);	Snapshot
	Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).	Snapshot
Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories	Type and quality of collateral;	Snapshot
	Maturity tenor of the collateral broken down in the	Snapshot. All outstanding/existing collateral at

	following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity;	the end of the reporting period should be aggregated according to their maturity tenor. That aggregation should be broken down in the mentioned maturity buckets.
	Currency of the collateral;	Snapshot. Currency of the existing collateral at the end of the reporting period.
	Maturity tenor of the SFTs and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions;	Snapshot. All outstanding/existing SFTs at the end of the reporting period should be aggregated according to their maturity tenor. That aggregation should be broken down in the mentioned maturity buckets.
	Country in which the counterparties are established;	Snapshot. Country where the counterparties of existing SFTs as of the end of the reporting period are established.

undertaking as part of SFTs and total return swaps	of collateral assets safe-kept by each of the custodians	
Safekeeping of collateral granted by the collective investment undertaking as part of SFTs and total return swaps	The proportion of collateral held in segregated accounts or in pooled accounts, or in any other accounts	Snapshot
Data on return and cost for each type of SFTs and total return swaps	broken down between the collective investment undertaking, the manager of the collective investment undertaking and third parties (e.g. agent lender) in absolute terms and as a percentage of overall returns generated by that type of SFTs and total return swaps	See explanation below table

Regarding the field “Cash collateral reinvestment returns to the collective investment undertaking”, during the year the fund receives a certain amount of cash as collateral for SFTs which is invested and produces a return. All SFTs have a given duration (normally short term) and there may be several SFTs that are carried out on a number of occasions with repeated investments and divestments of cash. Due to the possible concatenation of the operations, there may be a certain amount of cash collateral which is constantly invested for the whole year and produces a return. One interpretation is that the SFTR requires managers to disclose at least the overall sum of the returns earned by the fund from all the investment operations made during the year with cash collateral. This sum may only be an income flow that covers the whole year and therefore the distinction between aggregate vs snapshot (i.e. flow vs stock data) is not meaningful, because it could be calculated in only one way. One alternative would be to state that this is “aggregate” by definition. Another alternative would be to require the disclosure of the cash collateral investment return, calculated as the sum of the cash flows received for the investment of SFTs cash collateral over the yearly average amount of cash collateral investments.

The same reasoning applies to the field “Data on return and cost for each type of SFTs and total return swaps/broken down between the collective investment undertaking, the manager of the collective investment undertaking and third parties (e.g. agent lender) in absolute terms and as a percentage of overall returns generated by that type of SFTs and total return swaps”. The manager has to sum the inflows and outflows generated by all the operations during the year and disclose the two total amounts; again, there appears to be only one way to calculate

the data required and the disclosure of rate of returns (gross and net of cost) could be required if deemed more appropriate.

Section XIV: Branches

Date last updated: July 2018

Question 1: What are the supervisory responsibilities of competent authorities in host Member States when an alternative investment fund manager provides investment services through a branch established in the host Member State?

Answer: Under both the UCITS and the AIFM Directives, supervisory powers of competent authorities in relation to branches of UCITS management companies or alternative investment fund managers (AIFMs) established in a Member State that is not the home Member State are shared. The competent authority of the Member State in which the branch is located (host Member State) is responsible for the supervision of the branch's compliance with conduct rules referred to in Article 17(5) of the UCITS Directive and Article 45(2) of the AIFMD and the competent authority of the Member State in which the UCITS management company or the alternative investment fund manager is established (home Member State) is responsible for the supervision of the other requirements provided under the relevant applicable framework.²⁸

Neither the UCITS Directive nor the AIFMD provides for an explicit framework for the allocation of supervisory responsibilities and powers for those cases where UCITS management companies or AIFMs are authorised to carry out investment services set out in Article 6(3) of the UCITS Directive and Article 6(4) of the AIFMD and have branches providing those services in other Member States. ESMA is of the view that responsibilities of home and host Member States should be identified similarly to, and consistently with, the general framework established for the provision of activities pursued by UCITS management companies and AIFMs through branches as well as with the MiFID II framework regulating the supervision on the provision of investment services across the EU. This approach is in line with the division of responsibilities provided under the MiFID II framework. In accordance with Article 35(8) of MiFID II, the competent authority of the host Member State has the responsibility for ensuring that the services provided by the branch of an investment firm or a credit institution in its territory comply with the MiFID II requirements under Articles 24 (“General principles and information to clients”) and 25 (“Assessment of suitability and appropriateness and reporting to clients”) of MiFID II, which also apply to UCITS management companies and AIFMs providing investment services.

²⁸ See Article 17(4) and (5) of UCITS Directive and Article 45(1) and (2) of AIFMD. On this subject, see also “Notification frameworks and home-host responsibilities under UCITS and AIFMD”, an ESMA Thematic Study among National Competent Authorities https://www.esma.europa.eu/sites/default/files/library/esma34-43-340_final_report_on_thematic_study_on_notification_frameworks.pdf

Section XV: ESMA's guidelines on performance fees in UCITS and certain types of AIFs

Date last updated: 20 May 2022

Question 1 [last update 30 March 2021] [QA 961]: Based on paragraphs 40²⁹ and 41³⁰ of the guidelines on performance fees in UCITS and certain types of AIFs ("Guidelines on performance fees"), should performance fees be paid only at the end of the performance reference period of 5 years?

Answer 1 [last update 30 March 2021]: No. The Guidelines on performance fees do not prevent to pay performance fees during the performance reference period of 5 years and/or in the first years of a fund's existence, in case the fund has not existed for 5 years.

By way of example, if on the crystallisation date of the fund (e.g. at the end of the second year of existence of the fund), the fund has overperformed the reference indicator and there is a positive accrual of performance fees those can be paid. In this case, the accrual will be crystallised in the payment of the performance fees to the management company.

On the contrary, if on the crystallisation date of the fund (e.g. at the end of the third year of existence of the fund) the fund has underperformed the reference indicator and as a consequence there are no accrued performance fees, this underperformance is brought forward for the purpose of the calculation of performance fees the following year. In this way, compensation of negative performances is ensured over the years during a reference period of 5 years.

Example:

- Crystallisation date: end of the second year of existence of the fund

Performance of the fund: 10%

Performance of the reference indicator: 5%

Overperformance: 5%

Performance fees can be paid to the management company

- Crystallisation date: end of the second year of existence of the fund

Performance of the fund: 10%

Performance of the reference indicator: 10%

Overperformance: 0%

²⁹ Paragraph 40) of the Guidelines on performance fees states that "In case the fund employs a performance fee model based on a benchmark index, it should be ensured that any underperformance of the fund compared to the benchmark is clawed back before any performance fee becomes payable. To this purpose, the length of the performance reference period, if this is shorter than the whole life of the fund, should be set equal to at least 5 years."

³⁰ Paragraph 41) of the Guidelines on performance fees states that "Where a fund utilises a HWM model, a performance fee should be payable only where, during the performance reference period, the new HWM exceeds the last HWM. The starting point to be considered in the calculations should be the initial offering price per share. For the HWM model, in case the performance reference period is shorter than the whole life of the fund, the performance reference period should be set equal to at least five years on a rolling basis. In this case, performance fee may only be claimed if the outperformance exceeds any underperformances during the previous five years and performance fees should not crystallise more than once a year."

No crystallisation of performance fees

- Crystallisation date: end of the third year of existence of the fund

Performance of the fund: 5%

Performance of the reference indicator: 10%

Underperformance: -5% (this underperformance should be taken into account in the subsequent calculation of performance fees)

Not only performance fees cannot be paid but the underperformance of -5% should be brought forward to the following year and clawed back before any performance fee can be paid (see below)

- Crystallisation date: end of the fourth year of existence of the fund

Performance of the fund: 8%

Performance of the reference indicator: 5%

Overperformance: 3%

Underperformance from year 3 -5%

Global net performance: -2%

Not only performance fees cannot be paid but the underperformance of -2% should be brought forward to the following year and clawed back before any performance fee can be paid

This should not prevent NCAs to require funds to apply stricter rules (e.g. to crystallise fees only after 5 years or to apply reference periods longer than 5 years), bearing in mind that any specific provision applying at national level in addition to the provisions set out in the guidelines should not jeopardise the rules regarding funds' cross border distribution³¹ and the split of competences between the home and host competent authority³² to this regard.

Question 2 [last update 30 March 2021] [QA 962]: Paragraphs 40)³³ and 41)³⁴ of the Guidelines on performance fees recommend that the length of the performance reference period³⁵ (if this is shorter than the whole life of the fund) should be set equal to at least 5 years. How should the performance reference period be set for the first time in light of the application date of the guidelines?

Answer 2 [last update 30 March 2021]: Managers of any funds already compliant with paragraphs 40) and 41) of the Guidelines on performance fees before the application date of the guidelines should look at the past 5 years/whole life of the fund for the purpose of setting the performance reference period (i.e. they should not reset the performance reference period after the application date of the guidelines).

In all the other cases, managers should apply the performance reference period starting from the beginning of the financial year following 6 months from the application date of the Guidelines (i.e. the performance reference period should start at the beginning of the financial

³¹ See Chapter XI of the UCITS Directive.

³² See Chapter XII of the UCITS Directive.

³³ See footnote 19.

³⁴ See footnote 20.

³⁵ This is defined as "the time horizon over which the performance is measured and compared with that of the reference indicator, at the end of which the mechanism for the compensation for past underperformance (or negative performance) can be reset".

year following 5 July 2021; by way of example, if the financial year of the fund starts on 1 September 2021, the period 1 September 2021 – 1 September 2022 should be considered as the first year of the performance reference period).

Question 3 [last update 30 March 2021] [QA 1029]: Are ELTIFs in scope of the Guidelines on performance fees?

Answer 3 [last update 30 March 2021]: The Guidelines on performance fees apply to managers of UCITS and, in case Member States allow AIFMs to market to retail investors in their territory units or shares of AIFs they manage in accordance with Article 43 of the AIFMD, they also apply to AIFMs of those AIFs, except for:

a) closed-ended AIFs; and

b) open-ended AIFs that are EuVECAs (or other types of venture capital AIFs), EuSEFs, private equity AIFs or real estate AIFs.

Therefore, ELTIFs marketed to retail investors that do not have a closed-ended structure, within the meaning of Article 1(2) of the Delegated Regulation 694/2014³⁶, and are not venture capital/private equity or real estate AIFs are in scope of the guidelines.

Question 4 [last update 28 May 2021] [QA 1030]: Are registered AIFMs referred to in Article 3(2) of the AIFMD subject to ESMA's Guidelines on performance fees while marketing to retail investors units or shares of AIFs they manage?

Answer 4 [last update 28 May 2021]: The Guidelines on performance fees do not apply to registered AIFMs referred to in Article 3(2) of the AIFMD. Such registered AIFMs are only subject to the requirements referred to in that Article, which are outside the scope of the Guidelines. However, Member States may decide to impose stricter requirements on registered AIFMs and to allow them to market AIFs to retail investors in their territory, in accordance with Articles 3(3) and 43(1) of the AIFMD. In such cases, National Competent Authorities may also decide to apply the Guidelines to registered AIFMs.

³⁶ Article 1(2) of the Delegated Regulation 694/2014 states that "An AIFM of an open-ended AIF shall be considered to be an AIFM which manages an AIF the shares or units of which are, at the request of any of its shareholders or unitholders, repurchased or redeemed prior to the commencement of its liquidation phase or wind-down, directly or indirectly, out of the assets of the AIF and in accordance with the procedures and frequency set out in its rules or instruments of incorporation, prospectus or offering documents.

A decrease in the capital of the AIF in connection with distributions according to the rules or instruments of incorporation of the AIF, its prospectus or offering documents, including one that has been authorised by a resolution of the shareholders or unitholders passed in accordance with those rules or instruments of incorporation, prospectus or offering documents, shall not be taken into account for the purpose of determining whether or not the AIF is of the open-ended type.

Whether an AIF's shares or units can be negotiated on the secondary market and are not repurchased or redeemed by the AIF shall not be taken into account for the purpose of determining whether or not the AIF is of the open-ended type".

Question 5 [last update 20 May 2022] [QA 963]: Based on paragraph 40³⁷ of the Guidelines on performance fees, how should the performance reference period³⁸ for the benchmark model³⁹ be set?

Answer 5 [last update 20 May 2022]:

Paragraph 40) of the guidelines recommends that:

- i. any underperformance of the fund compared to the benchmark index should be clawed back before any performance fee becomes payable; and
- ii. the length of the performance reference period, if this is shorter than the whole life of the fund, should be set equal to at least 5 years.

In order to comply with the above recommendations, it should be ensured that any underperformance is brought forward for a minimum period of 5 years before a performance fee becomes payable, i.e. fund managers should look back at the past 5 years for the purpose of compensating underperformances.

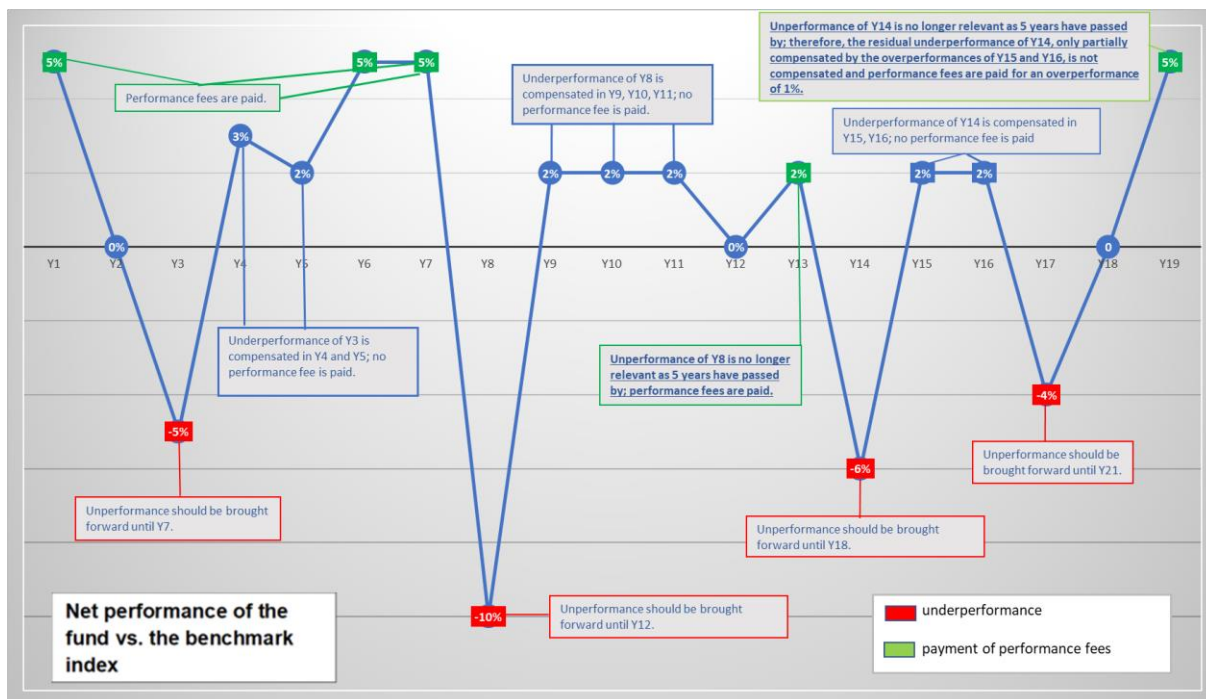

In case the fund has overperformed the benchmark index, the fund manager should be able to crystallise performance fees.

The following example illustrates the principles above (please note that the two tables below relate to the same example, the first one illustrated through a graphical representation, while the second one displayed in numerical terms):

³⁷ See footnote 19.

³⁸ See footnote 25.

³⁹ This is defined as a performance fee model whereby the performance fees may only be charged on the basis of outperforming the reference market index. See the definitions Section of the Guidelines on performance fees.

	Net performance	Underperformance to be compensated in the following year	Payment of performance fees
Y1	5%	0%	YES
Y2	0%	0%	NO
Y3	-5%	-5%	NO
Y4	3%	-2%	NO
Y5	2%	0%	NO
Y6	5%	0%	YES
Y7	5%	0%	YES
Y8	-10%	-10%	NO
Y9	2%	-8%	NO
Y10	2%	-6%	NO
Y11	2%	-4%	NO
Y12	0%	0% ⁴⁰	NO
Y13	2%	0%	YES
Y14	-6%	-6%	NO
Y15	2%	-4%	NO
Y16	2%	-2%	NO
Y17	-4%	-6%	NO

⁴⁰ The underperformance of Y12 to be taken forward to the following year (Y13) is 0% (and not -4%) in light of the fact that the residual underperformance coming from Y8 that was not yet compensated (-4%) is no longer relevant as the 5-year period has elapsed (the underperformance of Y8 is compensated until Y12).

Y18	0%	-4% ⁴¹	NO
Y19	5%	0%	YES

The following are additional examples aimed at further clarifying the mechanism of compensation of underperformances:

- i. in the case the net performance of the fund in Y18 was equal to 2% (instead of 0%), the underperformance to be carried forward to the following year (Y19) would be equal to -4%. This is in light of the fact that during Y18, the underperformance of -2% coming from Y14 should still be compensated and, in addition to that, the performance of -4% coming from Y17 should be brought forward to the following year.
- ii. in the case the net performance of the fund in Y18 was equal to 5% (instead of 0%), the underperformance to be carried forward to the following year (Y19) would be equal to -1%. This is in light of the fact that the residual underperformance coming from Y17 that was not yet compensated (-1%) should be brought forward to the following year (Y19).
- iii. in the case the net performance of the fund in Y18 was equal to 7% (instead of 0%), the net performance of the fund would compensate the underperformance of -6% coming from Y17. The positive accrual of performance fees for the 1% difference would therefore be crystallised in the payment of the performance fees to the management company. There would be no underperformance to be carried forward to Y19.

This is in line with the principle in the guidelines that underperformance in a given year (e.g. Y14) should still be compensated during a period which includes the fifth year following that underperformance (Y18), while not be brought forward to the sixth year (Y19).

Question 6 [last update 28 May 2021] [QA 1031]: How should the performance reference period⁴² be set in case of a merger where the receiving AIF is a newly established fund with no performance history and it is in effect a continuation of the merging AIF?⁴³

Answer 6 [last update 28 May 2021]: In order to ensure that the merger is not conducted with the aim of resetting the performance reference period, in the case of a merger where the receiving AIF is a newly established fund with no performance history and the competent authority of the receiving AIF assesses that the merger does not substantially change the AIF's investment policy, the performance reference period of the merging AIF should continue applying in the receiving AIF.

⁴¹ The underperformance of Y18 to be taken forward to the following year (Y19) is 4% (and not -6%) in light of the fact that the residual underperformance coming from Y14 that was not yet compensated (-2%) is no longer relevant as the 5-year period has elapsed (the underperformance of Y14 is compensated until Y18).

⁴² See footnote 25.

⁴³ Based on the scope section of the guidelines, "In case Member States allow AIFMs to market to retail investors in their territory units or shares of AIFs they manage in accordance with Article 43 of the AIFMD, the guidelines also apply to AIFMs of those AIFs, except for: (a) closed-ended AIFs; and (b) open-ended AIFs that are EuVECAs (or other types of venture capital AIFs), EuSEFs, private equity AIFs or real estate AIFs".

Question 7 [last update 16 July 2021] [QA 1032]: In case the authorised AIFM has delegated the portfolio management function to different delegated portfolio managers, would it be admissible to pay a performance fee to those delegated portfolio managers who have overperformed during the performance reference period, despite a global underperformance of the fund during the same performance reference period?

Answer 7 [last update 16 July 2021]: No. Based on paragraph 37 of the guidelines, performance fees:

- should be paid only where positive performance has been accrued during the performance reference period;
- could be paid in case the fund has overperformed the reference benchmark but had a negative performance.

The above also applies in case of delegation by the authorised AIFM to different delegated portfolio managers. Therefore, in case of a global underperformance of the fund, performance fees should not be paid to those delegated portfolio managers who have overperformed.

Question 8 [last update 16 July 2021] [QA 1033]: In case of creation of a new compartment/share class in an existing AIF in the course of its financial year or in case of creation of a new AIF, can performance fees be crystallised after less than 12 months from the date of creation of such a new AIF/compartment/share class?

Answer 8 [last update 16 July 2021]: No. Performance fees, if any, should be crystallised after at least 12 months from the creation of a new AIF/compartment/share class. Moreover, paragraph 35 of the guidelines foresees that the crystallisation date should be the same for all share classes of a fund that levies a performance fee.

Question 9 [last update 20 May 2022] [QA 967]: Paragraphs 40⁴⁴ and 41⁴⁵ of the Guidelines on performance fees recommend that the length of the performance reference period (if this is shorter than the whole life of the fund) should be set equal to at least 5 years. Is this requirement applicable to the hurdle rate model?

Answer 9 [last update 20 May 2022]: Yes, as paragraph 42 of the guidelines⁴⁶ clarifies that the only exception to the application of the 5-year performance reference period is “*the fulcrum fee model and other models which provide for a symmetrical fee structure*”.

⁴⁴ See footnote 19.

⁴⁵ See footnote 20.

⁴⁶ Paragraph 42 of the Guidelines states that “The performance reference period should not apply to the fulcrum fee model and other models which provide for a symmetrical fee structure, as in these models the level of the performance fee increases or decreases proportionately with the investment performance of the fund”.

Section XVI: Exemptions

Date last updated: 10 March 2023

Question 1 [last update 10 March 2023] [QA 697]: Article 3(2) AIFMD states the following: “Without prejudice to the application of Article 46, only paragraphs 3 and 4 of this Article shall apply to the following AIFMs:

- (a) AIFMs which either directly or indirectly, through a company with which the AIFM is linked by common management or control, or by a substantive direct or indirect holding, manage portfolios of AIFs whose assets under management, including any assets acquired through use of leverage, in total do not exceed a threshold of EUR 100 million; or
- (b) AIFMs which either directly or indirectly, through a company with which the AIFM is linked by common management or control, or by a substantive direct or indirect holding, manage portfolios of AIFs whose assets under management in total do not exceed a threshold of EUR 500 million when the portfolios of AIFs consist of AIFs that are unleveraged and have no redemption rights exercisable during a period of 5 years following the date of initial investment in each AIF”.

How should the notion of “substantive direct or indirect holding” in Article 3(2) of the AIFMD be interpreted. In particular, is there a quantitative threshold above which the criterion of substantive direct or indirect holding could be considered as met, and, if yes, what this threshold would be?

Answer 1: Answer provided by the European Commission in accordance with Article 16b(5) of the ESMA Regulation⁴⁷

As mentioned in Article 3(2)(a) AIFMD, the notion of “*substantive direct or indirect holding*” refers to situations where the AIFM manages the portfolios of AIFs through its direct or indirect holding in a company. This covers, for instance, situations whereby the AIFM *de facto* has the power to impose decisions on the AIF portfolio composition, its asset allocation or its risk management.

Article 3(2)(a) AIFMD does not set a quantitative threshold. The notion of “*substantive direct or indirect holding*” shall be assessed on a case-by-case basis by AIFMs supervisors.

⁴⁷ The answers provided by the European Commission clarify provisions already contained in the applicable legislation. They do not extend in any way the rights and obligations deriving from such legislation nor do they introduce any additional requirements for the concerned operators and competent authorities. The answers are merely intended to assist natural or legal persons, including competent authorities and Union institutions and bodies in clarifying the application or implementation of the relevant legal provisions. Only the Court of Justice of the European Union is competent to authoritatively interpret Union law. The views expressed in the internal Commission Decision cannot prejudice the position that the European Commission might take before the Union and national courts.

Section XVII: Marketing

Date last updated: 26 May 2023

Question 1 [last update 26 May 2023] [QA 707]: Are non-EU AIFMs allowed to carry out pre-marketing activities pursuant to Article 30a of the AIFMD?

Answer 1 [last update 26 May 2023]: No, Article 30a of the AIFMD does not cover pre-marketing activities by non-EU AIFMs. Therefore, non-EU AIFMs should not be allowed to carry out pre-marketing activities pursuant to the AIFMD. However, national laws, regulations and administrative provisions may allow non-EU AIFMs to carry-out pre-marketing activities at national level and where this is the case, non-EU AIFMs do not benefit from a passport allowing them to carry out these activities in other Member States.

In line with recital 12 of Directive (EU) 2019/1160, such national laws, regulations and administrative provisions should not in any way disadvantage EU AIFMs vis-à-vis non-EU AIFMs.
